Agenda

Wednesday, February 25th 2026
1:30-3:00 pm

Meeting Location

Alaska DOT Mat Su District Office, Upstairs Conference Room at 500 S. Seward Meridian Pkwy, Wasilla, Alaska. There is limited parking at building's main entrance, overflow parking lot to south.

1. Call to Order and Roll Call
 - a. Welcome Deputy Commissioner Katherine Keith as the new representative on MVP's Policy Board for DOT&PF
2. Consent Agenda (**Action Item**)
 - a. Approval of the February 25th, 2026 Agenda
 - b. Approval of the December 17th, 2025, Minutes
3. Staff Report
 - Staff Report and Schedule of Monthly Tasks
 - Quarterly Financial Report
 - Draft Audit Report
4. Technical Committee Action Items, February 10th, 2026 Meeting
 - a. *Motion to recommend that the MVP Policy Board adopt the Alaska DOT&PF performance targets for 2026 (Schaal). Seconded. No objections, no further discussions. Motion is approved unanimously.*
 - b. *5307 split recommendation- the TC directed MVP staff to provide information about ARRC and Valley Transit operations and funding before making a recommendation to the PB. Expected Recommendation in March.*
5. Voices of the Visitors (**Non-Action Items**)
6. Action Items
 - a. Adoption of Alaska DOT&PF 2026 Safety Performance Measure Targets (**Action Item**)
7. Old Business
 - a. MTP Update

- Formal Call for Project Nominations 1.28.2026 – Packet
 - Survey Results & Comment Map Responses
 - b. FFY26-29 STIP Update, Alaska DOT&PF
 - c. Alaska DOT&PF’s Long-Range Transportation Plan (LRTP) Sara Lucey
8. New Business
 9. Transit Update
 - MSB position on the 5307 split policy and ARRC response
 - Special Transit Public Meeting: March 12th, 5:30-7pm Wasilla Senior Center
 - Virtual Special Transit Public Meeting March 24th, 5:30-7:pm Teams
 10. Other Issues
 - a. Technical Committee At-large Seat Vacancy
 - Transit Advocate
 - Mobility/Bike and Pedestrian Advocate
 11. Informational Items
 - a. Approval of FFY 2026 Highway Safety Improvement (HSIP) Funding Plan amendment from the Commissioner
 - b. Mat-Su Transportation Fair February 25th at Raven Hall 3pm-7pm
 - c. Resolution from North Lakes Community Council for Project Nominations
 - d. Letter from North Lakes Community Council about the FTA 5307 funding split
 - e. Alaska Active Transportation Funding Source Guide
 - f. Letter from Commissioner Anderson, Alaska DOT&PF:
Deputy Commissioner Katherine Keith will serve as Acting Central Region Director. In this role, Deputy Commissioner Keith will also serve as DOT&PF’s designated representative to the MVP MPO Policy Board.
 12. Policy Board Comments
 13. Adjournment

Next Scheduled MPO Policy Board Meeting – March 25th, from 1:30 pm to 3:00 p.m. to be held via Microsoft TEAMS and at the Alaska DOT Mat-Su District Office at 500 S Seward Meridian Pkwy, Wasilla, Alaska.

MVP Policy Board Meeting February 25th, 2026

Action Item: Adoption of Alaska DOT&PF Safety Performance targets for 2026

Recommended Motion: *Motion to adopt the Alaska DOT&PF performance targets for 2026.*

Motion

Second

Vote

Staff Summary

Performance Targets for FFY26

The Performance Measure Target Work Group evaluated the performance targets for conformance with federal regulations, including 23 CFR 490 Subpart B, which requires states to establish performance targets that demonstrate constant or improved safety performance. With this process, the Work Group also considered the Strategic Highway Safety Plan goal of achieving zero roadway fatalities in Alaska by the year 2050.

The Work Group recommended that the HSIP targets continue to align with this long-term safety goal using a five-year rolling average.

Approved DOT Safety Targets for 2026 include:

Less than 59.3 fatalities

Less than 1.074 fatalities per 100 million vehicle miles traveled

Less than 264.7 serious injuries

Less than 4.819 serious injuries per 100 million vehicle miles traveled

Less than 45.8 non-motorized fatalities and non-motorized serious injuries combined

Additional Goal: zero roadway fatalities by 2050.

How will MVP support Safety Targets in Practice?

Our MTP has goals that support improved safety for all modes. In our project scoring criteria for the MTP we are prioritizing projects that support:

- Intersection safety improvements
- Pedestrian and bicycle safety projects
- Traffic calming or speed management

- Systemic safety improvements (signing, striping, lighting)
- Planning studies that help with access management and identifying upgrades that support future safety improvements.

By adopting these targets, the MVP is committing to consider safety outcomes when planning and selecting transportation projects. Success is measured by aligning plans, programs, and investment decisions with safety priorities—not by guaranteeing a specific reduction in crashes or fatalities.

In July of 2025, the MVP Policy Board voted to approve signing on the DOT&PF Performance Planning Target Setting Procedures Memorandum of Understanding (MOU) ensures the requirements of 23 CFR 450.314 (h) are met.

This MOU states that MVP will

- 1) Share transportation performance data
- 2) Select Performance Targets via adoption of the DOT Targets or developing our own
- 3) Reporting on performance targets data

MVP is responsible for notifying DOT if we select our own performance data and collecting data from public transit providers.

MVP staff recommend that we sign on to the DOT&PF performance targets for 2026, rather than developing our own.

The signed MOU is in the packet on Page

Representatives:

Bob Charles – Knik Tribe (**Secretary**)
Edna DeVries, Mayor – MSB (**Vice Chair**)
Glenda Ledford, Mayor – City of Wasilla
Brian Winnestaffer - Chickaloon Native Village
Mike Brown – MSB
Sean Holland - DOT&PF (**Treasurer**)
Jim Cooper, Mayor – City of Palmer (**Chair**)

Minutes

Wednesday, December 17th, 2025
1:30-3:00 pm

Meeting Location

Alaska DOT Mat Su District Office at 500 S. Seward Meridian Pkwy, Wasilla, Alaska
There is limited parking at the building's main entrance, and an overflow parking lot to the south.

1. Call to Order and Roll Call

The meeting was called to order at 1:30 pm.

Members present:

Bob Charles – Knik Tribe
Brian Winnestaffer - Chickaloon Native Village
Edna DeVries, Mayor - MSB
Jim Cooper, Mayor – City of Palmer
Mike Brown - MSB
Chris Bentz – (proxy for Sean Holland) DOT&PF

Members absent:

Glenda Ledford, Mayor – City of Wasilla

Visitors Present:

Adam Bradway – AK DOT&PF
Anjie Goulding – MVP
Ben White – AK DOT&PF
Carrie Cecil – MVP
Kim Sollien – MVP
Pat Cotter – RESPEC
Emily Haynes – FHWA
Randy Warden – FHWA
Alex Strawn – MSB
James Marks

2. Consent Agenda (**Action Item**)
 - a. Approval of the December 17th, 2025, Agenda
 - b. Approval of the November 19th, 2025, Minutes

Motion to approve the consent agenda and minutes (*Winnestaffer*), seconded (*Cooper*). No discussion, no objection. Approved.

3. Staff Report
 - Staff Report
 - a. Schedule of topics

Kim Sollien provided brief staff report:

Open House:

- Thank you to all of the policy board members who joined us at our December 3 Open House and provided support answered questions.

At-large seats on the Technical Committee

- Currently, there are three at-large seats on the Technical Committee (trucking advocate, public transit advocate, and pedestrian and bicycle mobility advocate)
- Stuart Leidner recently stepped down as bike and ped mobility advocate. MVP staff will be announcing the opening for that seat soon.
- An opening for the public transit seat will also be announced following communications with technical committee as current seat holder has not responded to request for continued involvement.

Engagement with local, regional, tribal entities:

- Per federal regulations, MVP need to engage with local, state, and tribal entities on MTP
- As such, please expect an email asking how/ if you would like a formal presentation. Options include:
 - MVP staff can provide the entire presentation
 - You can provide the presentation and MVP can provide support
 - If you don't want a formal presentation (e.g., Knik has requested info packets in lieu) please let us know so that we can document that as part of our MTP process

4. Voices of the Visitors (Non-Action Items)

None.

5. Technical Committee Action Items
 - a. *MTP Vision, Goals, and Objectives Motion to recommend that the Policy Board approve the MTP vision, Goals, and Objectives as presented. Motion by Dan Tucker, seconded, passed without objection*

6. Action Items
 - a. MTP Vision, Goals, and Objectives **Recommended Motion: Motion to approve the MTP vision, Goals, and Objectives as presented.**

Motion to approve as presented (Cooper), seconded (Winnestaffer).

Discussion:

Kim Sollien directed attention to summary of comments received beginning on page 20 of the packet. During the 30-day public comment period, MVP received 8 comments: five directly addressed vision, goals, and objectives and three were more general comments and/ or incomplete. MVP provided direct response to all comments received. MVP staff similarly reviews and, as appropriate, responds to all comments received outside of open comment periods.

Roll call vote:

- Bob Charles – yes
- DeVries – yes
- Winnestaffer – yes
- Brown – yes
- Bentz – yes
- Cooper – yes

Motion is approved.

- b. 26-29 DOT&PF Carbon Reduction Program Consultation: 34464 Fleet Conversion Adam Bradway, Alaska DOT&PF. **Recommended Motion, Motion to approve ADOT&PF usage of \$636,790 of MVP’s CRP FFY25 suballocation for Fleet Conversion and requesting a written agreement that the funds be returned to MVP in the form of STBG funding in FFY27.** See TC discussion notes in page 3 of the packet.

Adam Bradway presented the project request for consultation with MPO per federal regulation. Associated documents start on page 26 of the packet. AK DOT&PF would like to program approx. \$636,000 of Carbon Reduction Program funds to support fleet conversion. To date, MVP has not used any of the CRP funds that they received; CRP funds have specific limitations on use. FHWA has requested assurances that vehicles would be used within the MPA boundaries. Technical Committee asked DOT for agreement to offset with STBG in the future to offset the use of these CRP funds now. STBG flex funds have a much wider range of applications and can be used throughout the state. Additionally, it is possible that CRP funds will not be provided in the future pending the expected 2026 reauthorization from Congress. It is possible that FHWA may not authorize this particular use of CRP funds given boundary limitations – further engagement is needed.

Motion to amend movement to approve ADOT&PF usage of \$636,790 of MVP’s CRP FFY25 suballocation for Fleet Conversion provided that a written agreement that the funds be returned to MVP in the form of STBG funding in FFY27 be prepared by ADOT&PF. Seconded (Winnestaffer). No further discussion, no objections. Approved.

7. Old Business
 - a. MVP Improvement Program Update on Scope, Schedule, and Budget. ADOT&PF Chris Bentz.

Chris Bentz presented update on projects. Associated documents included as page 27 and 28 of the packet.

- This is an update on the MVP improvement program to set aside up to \$1 mil annually to work on smaller projects that might be completed more expediently. The Policy Board had previously approved a list of 14 projects, mostly repaving with some new paving. Projects were recommended by the City of Wasilla, City of Palmer, and MSB. This read out concerns the design and review of projects. This will inform the scope, schedule, and budget of the projects. Eventually, will need to engage partners to establish match funding.
- The DOT&PF team spent the 2025 field season looking at things required by fed/ state guidelines to ensure all projects meet standards required for use of federal funds – e.g., ADA ramps, utility lines.
 - The team did identify some ramps that need to be improved to ADA but they do not conflict with the ROW so no associated additional costs.
 - On all 14 roads, 40 plus locations where utilities do not meet requirements. In process now of obtaining as-builts and checking with utilities for permits to assign financial responsibility for rectifying the issues.
- DOT&PF expect to do combined review of all projects in spring and early summer, which should be accompanied by better cost estimates.

Jim Cooper asked if curb and gutter are included as part of these projects?

Chris Bentz notes that drainage was excluded as part of this review to expedite the projects. Any curb and gutter issues, the city/ MSB need to be addressed separately. Combining would result in project delays of up to 1-2 additional years.

b. MTP Update

- Interactive Project Map Live
- Formal Call for Projects from agencies date pending mid-late January
- Stakeholder outreach and special meeting schedule- letters sent

Kim Sollien noted:

- We are receiving good engagement through our interactive comment map and to continue to encourage others to use it.
- Have not set a date for formal project nominations. We are waiting on deliverables from Respec on Friday including a project list (what they would recommend to improve network). Hope to present that in January.

Adam Bradway noted that DOT&PF is also working on their project list for the next 25 years in parallel with MVP's MTP process. DOT&PF expects to bring this list to the board at about the same time as MVP's project list. As part of this, DOT&PF will also be reaching out more informally to engage with the cities, MSB, and tribes to discuss DOT's vision for what is expected in the next 25 years.

c. MVP FFY 24&25 Funding Allocations, Carryover, and FFY26 Funding Award

- Letter from ADOT&PF documenting improvements that could be made with the 3C process, STIP involvement, carryover funding,

and usage of MPV's suballocations without consultation- Ben White, Alaska DOT&PF

a. Letter to the Policy Board From ADOT&PF

Ben White presented a summary of the letter, which is the outcome of Technical Committee and Policy Board meetings in October.

- The letter addresses both the past programming variances that led to MVP's funds being used without notification as well as plans for carry over funds in FY26.
- Overall result is that MVP is going to walk away with more funds in FY26 (including TIFIA funds).
- DOT&PF recommendations moving forward:
 - DOT should provide written documentation of how MVP funds are intended to be programmed in advance notice where possible.
 - Add programming of carry over funds as a subject line to MPO quarterly meetings to make sure that everyone's financial programming is being addressed consistently.
 - DOT should prepare an annual report of where the funds went and how they were spent.
- Clarification that federal funds are typically available for 3-years (depending on program). It is DOT&PF practice to program older and harder to spend funds first. This means that FY24 funds programmed may not be replaced with other FY24 funds but funds from FY25, etc. to make the MPO whole.
 - MVP FFY 24,25,26 funding and project documentation Update - Adam Bradway, Alaska DOT&PF
 - a. FFY2026 suballocation documentation from ADOT&PF
 - b. Carry forward the workbook from ADOT&PF
 - c. MVP Program of Projects Accounting (purple highlights =funding projects)
 - d. MVP Accounting of Projects that used our funding

Additional details in support of above agenda topic and discussion.

d. FFY26-29 STIP Update Adam Bradway, Alaska DOT&PF

Expecting STIP out around Legislative session (3rd week January) for 45-day public comment.

e. Alaska DOT&PF SAFEROADS initiative Adam Bradway, Alaska DOT&PF

No new updates. It is expected that there would be programming of some funds in STIP towards this initiative.

8. New Business
9. Other Issues
 - a. MTP Video edit request by Alaska DOT&PF

The video has been edited and is back online.

- b. Small Urban Apportionment (split) letter for FY 2024 in the Wasilla - Knik - Fairview - North Lakes (WKFNL) small urban area
- c. Transit update- 5307 Split letter

Kim Sollien initiated discussion with summary of the two letters included in the packet starting on page 72.

- The Small Urban Apportionment letter from the AK DOT&PF Commissioner was a hang up in getting 5307 grant funds to direct recipients for FY24 funds. The letter indicates that a future policy will be developed to allocate funds within small urban areas.
- The Commissioner has requested MVP input on policy for future allocations (i.e., split).
- The ARRC has provided a letter suggestion proposed split.
- The request to the Policy Board then is to provide further direction on what engagement they would like MVP to have in this process and what information they need to facilitate that engagement

Brian Winnestaffer – Chickaloon receives FTA funds through Tribal Transit funds and recognizes that FTA requires close tracking of various transit metrics. It would be good to have some comparison between railroad and Valley Transit numbers since that is how FTA allocates funds.

Mike Brown –

- Did not see the logic in the AARC letter describing the methods of splitting funds in Anchorage as translating well to MVP and FAST; however, the railroad has been receiving these funds for passenger operations for years. To that end, he suggests that there So thinks there may be a better balance between the full amount AARC is asking for and \$0. The MSB is supportive of exploring different options for funding splits. This is no longer as urgent because the immediate need to support Valley Transit is taken care of with the FY24 funds as allocated in the Commissioner’s letter.
- Senses we are not obligated to give them funds, but they do qualify (FTA must be recognizing them in some way or form to be giving them funds).
- If there is a way to connect to services or infrastructure within the boundary, that would make more sense. The MSB would like to work through what other options are out there.
- The other fiscal reality is the match component from the borough. E.g., if they get all the funds and the MSB is unable to meet that match. This is something that will need further discussion and review of MSB financials.

Bob Charles – This is going way back to getting statutory language put in by Ted Stevens. Moving forward, the focus should be on the appropriate split of these funds between the borough and AARC.

Jim Cooper – Raised concerns that AARC is saying they need funds, but they are just continuing to reduce services overall.

Summary of requests from Policy Board:

- Research on ridership data, infrastructure data, etc.
- Research on what other funding sources to support AARC other than 5307?
- A general write up of intent of 5307 funds and what makes this unique

10. Informational Items

- a. Community Outreach & Engagement Analytics Report

Anjie Goulding provided a high level report out on what we are seeing on across our social media and outreach platforms and how we are using these platforms to improve outreach to the community and track engagement.

- FB = 12k plus views, 60 followers
- Insta = 12k plus views, 104 followers

11. Policy Board Comments

Brian Winnestaffer: Suggested that social media could focus on partnership by emphasizing different Technical Committee and Policy Board members/ organizations.

12. Adjournment

The meeting was adjourned at 2:56 pm.

Next Scheduled MPO Policy Board Meeting – January 28th, from 1:30 pm to 3:00 p.m. to be held via Microsoft TEAMS and at the Alaska DOT Mat-Su District Office at 500 S Seward Meridian Pkwy, Wasilla, Alaska.

January 2026 Staff Report

FFY25/26 UPWP Tasks

TASK 100 A UPWP

- Prepared the Technical Committee agenda and packet
- Prepared the UPWP Q1 report

Task 100 B Metropolitan Transportation Plan

- Final review of the RESPEC project list
- Final review of the Existing Conditions Report, Level of Service Report, and Travel Model report
- Review of the MTP public comment map and synthesize themes
- Prepared informational material to support the initiation of the project nomination period
- Updated website, drafted emails and social media to support formal project nomination period and close of public comment period

TIP /Project Scoring Criteria

Complete Streets Policy

- Review of draft Complete Streets Policy and workshopping edits with RESPEC

Task 100 C TransCad Modeling

TASK 100 D Household Travel Survey

TASK 100 E Transportation Improvement Program

TASK 100 F: Update and Implementation of the Public Participation Plan and Title VI Plan

- Continue daily social media posts to encourage public engagement and new comments on our interactive map and take the survey
- Updated website

TASK 100 G Support Services

Budget Management

- Met with the accountant to reorganize direct and administrative expenses for the auditor
- Finalized Audit prep documentation- the firm requested significant documentation about our funding, accounting procedures, back-up documentation on expenses, and board meeting minutes from the quarterly financial reports.
- Reconciled the December financials to prep for 1099 submission/report
- Drafted the 1st Quarter Financial Report

Meetings

- Prepared and conducted a series of presentations introducing MVP, the MTP, and the Project Nomination process to:
 - The MSB Local Road Service Area Advisory Board
 - The City of Palmer
 - The City of Wasilla
 - Chickaloon Native Village Tribal Council

Staffing

- Conducted interviews for the Communications and Office Manager

Correspondence

Nonprofit Filings and Reports

Organizational Documents

Agency Relationships

Contract Management

Requests from the Policy Board and Technical Committee directed to the staff

- Announced nonmotorized advocate and transit representative at-large positions for the Technical Committee

Strategic Planning

Short-Range and Tactical Planning

Long-Range Planning

Training

- Staff continue with the AMPO MTP training
- GIS training to use the MSB GIS system
- Attended Federal Aid Training hosted by DOT AK&PF

Transit Support

TASK 200 A MSB Public Transit Planning Support

- Met with MSB Planning to discuss a Public Transit Stakeholder meeting
- Met with Honu Consulting to discuss support for the Transit Stakeholder meeting
- Met with the MSB and DOT to discuss the transfer of Valley Transit bus and van titles from the DOT to the MSB
- Met with Valley Transit to discuss the 5307 funding split request

TASK 200 B Transit Development Plan

No activity

TASK 300 Asset Management Plans

No activity

TASK 300 A MVP Sign Management Plan

No activity

TASK 300 B MVP Advanced Project Definition

- ADOT&PF is working on confirming utility issues and needs

TASK 300 C MVP Streetlight and Intersection Management Plan

No activity

TASK 300 D Pavement Asset Management Plan

Alaska DOT&PF is working on initiating this project based on MSB request

February 2026 Staff Report

FFY25/26 UPWP Tasks

TASK 100 A UPWP

- Prepared the Policy agenda and packet

Task 100 B Metropolitan Transportation Plan

- Final review of the Existing Conditions Report, Level of Service Report, and Travel Model report
- Review of the MTP public comment map and synthesize themes
- Updated website, drafted emails and social media to support formal project nomination period and close of public comment period
- Presentation on the MTP and Project Nomination period delivered to MSB Assembly on 2/3
- Presentation on the MTP and Project Nomination period delivered to Wasilla Planning Commission on 2/10
- Presentation on the MTP and Project Nomination period delivered to MSB transportation Advisory Board on 2/13
- Met with MSB engineering staff to discuss pavement and other asset data to ensure accurate application and interpretation in existing conditions report (2/2)

TIP /Project Scoring Criteria

Complete Streets Policy

- Continued review of draft Complete Streets Policy and workshopping edits with RESPEC

Task 100 C TransCad Modeling

TASK 100 D Household Travel Survey

TASK 100 E Transportation Improvement Program

TASK 100 F: Update and Implementation of the Public Participation Plan and Title VI Plan

- Continue daily social media posts to encourage public engagement and new comments on our interactive map and take the survey
- Updated website

TASK 100 G Support Services

Budget Management

- Completed 1st Quarter Financials
- Received the Audit Draft, including the Audited financial statement and the letter to the Policy Board

Meetings

- Met with DOT and Cambridge Systems to discuss MVP support of SHSP preparation as members of steering committee and/ or attendance of focus area meetings (2/11)
- Met with MatSu Health Foundation representatives to discuss survey results of their Community Health Needs Survey and the intersection of community health and transportation needs (2/13)
- Attended SHSP Youth/Older populations and ATV/ Snowmachine focus area discussion (2/12)
- Transit Roundtable meeting (2/11)
- Attended the Quarterly MPO meeting in Anchorage with AMATS, FAST, DOT, FHWA and FTA.

Staffing

Correspondence

- Letter from Commissioner Anderson: Effective upon Director Hollands' retirement, Deputy Commissioner Katherine Keith will serve as Acting Central Region Director. In this role, Deputy Commissioner Keith will also serve as DOT&PF's designated representative to the MVP MPO Policy Board. Per our Bylaws: Vacancies on the Policy Board or any officer positions, including vacancies resulting from (a) an increase in the number of Policy Board members or officer positions, or (b) the death, resignation, or removal of a Policy Board member or officer, shall be appointed by the member organization of the vacant seat as outlined in the Inter-Governmental Operating Agreement and Memorandum of Understanding for Operations of the MVP office.

Nonprofit Filings and Reports

Organizational Documents

- All Conflict of Interest forms for current TC and PB members and staff complete

Agency Relationships

Contract Management

- Worked on a template to use for writing MVP's upcoming Scopes of Work for contracting consistency.

Requests from the Policy Board and Technical Committee directed to the staff

- Continue to search for nonmotorized advocate and transit representative at-large positions for the Technical Committee

Strategic Planning

Short-Range and Tactical Planning

Long-Range Planning

Training

- Staff Completed AMPO MTP Deep Dive training

Transit Support

TASK 200 A MSB Public Transit Planning Support

- Met with Honu Consulting to discuss support for the Transit Stakeholder meeting and reviewed agenda and creatives for these meetings.
- Social media, Frontiersman Digital Ad, Mail Chimp Mailer, Website updates for Public Transit Workshops upcoming in March.
- Booked Wasilla Senior Center for Public Transit In-person workshop.

TASK 200 B Transit Development Plan

No activity

TASK 300 Asset Management Plans

No activity

TASK 300 A MVP Sign Management Plan

No activity

TASK 300 B MVP Advanced Project Definition

- ADOT&PF is working on confirming utility issues and needs

TASK 300 C MVP Streetlight and Intersection Management Plan

No activity

TASK 300 D Pavement Asset Management Plan

Alaska DOT&PF is working on initiating this project based on MSB request

MVP Monthly Schedule of Tasks January 2026-December 2026

January 2026

- Launch Formal Call for Projects
- Present to key stakeholders
- Present RESPEC-developed MTP project list
- Present the Existing Conditions, Level of Service Report, and Model Report for review

February 2026

- Adoption of Alaska DOT&PF Performance Measures
- Presentation of MTP Survey Comment Map Results
- MTP Project Evaluators meeting

March 2026

- transit stakeholder meetings on March 12th and 24th
- Presentation about complete streets/link to federal regulations and plan goals to TC and PB
- TAP Funding MVP Local Control Plan Review
- Develop Carbon Reduction Program Criteria: priorities for MVP-projects need to be awarded under a competitive process
- Grandfather agreements with ADOT&PF for all the current CTP & TAP projects so that we have them prior to the TIP development
- Review TIP Funding Policy to the Technical Committee and Policy Board
- Review Projects Nominated
- Score Nominated Projects
- Project Review Committee Special Meeting
- Public engagement to review nominated projects

April 2026

- Host a Bike and Pedestrian stakeholder meeting
- ADOT planning-level cost estimates for projects
- Finalize MTP Project list

- Present project list to TC and PB for approval
- Review and Approve Complete Streets Policy with TC and PB
- Draft FFY27&28 UPWP
- Draft scope of work for Streetlight, Pavement, and intersection management plans

May 2026

- Review and Approve FFY27&28 UPWP for a 30-day public notice
- 30-day public notice about MTP projects
- Discussion on Planning Studies/ new committees bike and ped and freight that may be needed as a result of the MTP. What else do we need to look at to support the building of our transportation system/infrastructure
- O&M state of the system maintenance report
- Draft Summary Fiscal Plan Report
- Draft Transit Plan Scope
- Draft Household Travel Survey Scope

June 2026

- Draft TIP and Review with TC and PB
- Receive FFY27 PL allocations
- Approval of FFY27&28 UPWP 30-day public review
- Apply Performance Measures to MTP projects
- Fiscal Plan Summary Report Review with TC and PB

July 2026

- Review Public Comments about the FFY227/28 UPWP
- Review and Approve MTP for 30-day public comment period
- MTP Public Event – final draft project list
- Draft TIP

August 2026

- Review TIP and release for a 30-day public comment period

MATSU VALLEY
PLANNING *for*
TRANSPORTATION

- Review and Approve FFY27/28 UPWP and submit to ADOT, FHWA, and FTA

September 2026

- Review Draft MTP comment log

October 2026

- Review TIP Comment log
- Present final MTP to TC and PB for approval

November 2026

- Present final TIP to TC and PB for approval

December 2026

- New MPOs should have a formally adopted MTP and TIP by **December 29, 2026**

INTEROFFICE MEMORANDUM

TO: KIM SOLLIEN, EXECUTIVE DIRECTOR, MATSU VALLEY FOR PLANNING FOR TRANSPORTATION
FROM: TOBY SMITH, THE FORAKER GROUP SHARED FINANCIAL SERVICES
SUBJECT: DECEMBER 2025 FINANCIAL STATEMENTS
DATE: FEBRUARY 7, 2025

Overview

Along with this memo you will find the Balance Sheet and related Profit and Loss by Class report for MVP, along with a Profit and Loss report for MVP, from October 1, 2025 through December 31 2025, the first quarter of Fiscal Year 2026. Also included is a Budget versus Actual report for MVP.

BALANCE SHEET

The Balance Sheet is a snapshot of MVP's assets (cash in the bank) and liabilities (monies owed) at a given point in time.

Cash Balance

As of the last day of December 2025, MVP had cash on hand of \$137,095 in the Mat-Su Valley Federal Credit Union checking account and \$29,9341 in the savings account, along with \$548,911 in the money market account.

Accounts and Grants Receivables

Accounts receivables as of December 2025 were \$0.

Deposits

Deposits held as assets include a \$500 payroll deposit paid to the payroll vendor to cover unexpected occurrences or contingencies.

Current liabilities

The current liabilities balance of \$168,984 includes:

- Accounts payable of \$0
- Accrued payroll of \$15,145
- Annual leave liability of \$19,164
- Deferred Revenue of \$134,674
- Other payroll liabilities of \$0

Deferred Revenue consists of cash that has been received by MVP but the posting of the revenue has been deferred (delayed) until the cash is spent. Revenue is recognized as costs are incurred and expenses are paid. The current balance is comprised of the Mat-Su Borough grant. The amount of deferred revenue is the amount of the grant yet to be spent and is considered a liability since the funds must be spent for a specific purpose.

As of the end of December the current ratio (current assets divided by current liabilities) was 4.2 to 1. This means that for every dollar spent, there are 4.2 in the bank or owed to MVP, so the higher the number the better.

Net Assets

As of the end of December 2025, MVP had total net assets of \$549,667.

PROFIT AND LOSS BY CLASS

This page shows the amount of revenue received and expenses paid as of December 31, the third month of Fiscal Year 2026, by class.

BUDGET VS ACTUALS

This page shows the amount of revenue received and expenses paid as of December 31 versus the FY26 annual budget.

Revenue & Support

Three months into the fiscal year, revenues and expenses are anticipated to be 25% realized. Revenues for the fiscal year to date total \$105,574. This represents 11% of the revenue budgeted for the year versus 25% of the fiscal year being completed. Any future grant revenues that are deferred (delayed) will be recognized as expenses are made.

Expenses

Operating expenses through December totaled \$123,807 or 16% of the annual budgeted amount, versus 25% of the fiscal year being completed.

CAPITAL FLOAT

Each partner organization is required to pay membership dues which comprise MVP's capital float, which exists in order to provide a cash balance on hand since grant revenues are reimbursable after costs have been expended. The capital float supports MVP operations until grant receivables are received.

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Letter to the Governing Board

Year Ended September 30, 2025

PRELIMINARY DRAFT
FOR DISCUSSION PURPOSES ONLY

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Letter to the Governing Board

Year Ended September 30, 2025

MONTH XX, 2026

Members of the Governing Board
Mat-Su Valley Planning for Transportation
Wasilla, Alaska

We have audited the financial statements of Mat-Su Valley Planning for Transportation for the year ended September 30, 2025, and have issued our report thereon dated MONTH XX, 2026. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated November 8, 2025. Professional standards also require that we communicate to you the following information related to our audit.

Accounting Policies and Transactions

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by Mat-Su Valley Planning for Transportation are described in Note I to the financial statements. All significant transactions have been recognized in the financial statements in the proper period. No new accounting policies were adopted and the application of existing policies was not changed during 2025. We noted no transactions entered into by the Organization during the year for which there is a lack of authoritative guidance or consensus.

Significant Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were:

Management's estimate of collectability of accounts receivable is calculated on historical losses information, economic conditions, character of the credit risk and reasonable and supportable forecasts. We evaluated the key factors and assumptions used to develop credit losses in determining that it is reasonable in relation to the financial statements taken as a whole.

Management's estimate of the useful lives and depreciation is based upon the expected useful life of an asset. We evaluated the key factors and assumptions used to determine the useful lives and calculate depreciation expense in determining that it is reasonable in relation to the financial statements taken as a whole.

Management's estimate of the functional expenses is based upon an allocation of program expenses and general and administration. We evaluated the key factors and assumptions used to develop the allocation of expenses in determining that it is reasonable in relation to the financial statements taken as a whole.

Financial Statement Disclosures

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to the financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated MONTH XX, 2026.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the Organization's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Internal Control

In planning and performing our audit of the financial statements of the Organization, as of and for the year ended September 30, 2025, in accordance with auditing standards generally accepted in the United States of America, we considered the Organization's internal control over financial reporting (internal control) as a basis for designing our audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Organization's internal control. Accordingly, we do not express an opinion on the effectiveness of the Organization's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the Organization's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the Organization's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Accounting Assistance

As part of our engagement we drafted the financial statements of Mat-Su Valley Planning for Transportation from the Organization's accounting records; however, management of the Organization was involved in the drafting process and retains responsibility for the financial statements.

Restriction on Use

This information is intended solely for the use of the governing board and management of Mat-Su Valley Planning for Transportation and is not intended to be, and should not be, used by anyone other than these specified parties.

Sincerely,

Anchorage, Alaska

Independent Auditor's Report

Members of the Board of Directors
Mat-Su Valley Planning for Transportation
Palmer, Alaska

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mat-Su Valley Planning for Transportation (a nonprofit organization), which comprise the statement of financial position as of September 30, 2025 and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Mat-Su Valley Planning for Transportation as of September 30, 2025 and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Mat-Su Valley Planning for Transportation and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Mat-Su Valley Planning for Transportation ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness Mat-Su Valley Planning for Transportation internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Mat-Su Valley Planning for Transportation’s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Notes to Financial Statements

September 30, 2025

f(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

Incorporated in 2025, Mat-Su Valley Planning for Transportation is a not-forprofit organization established as the Metropolitan Planning Organization (MPO). Mat-Su Valley Planning for Transportation serves as the Mat-Su Valley, Alaska area long range planning organization for the transportation system in the urbanized area of the Matsu-Valley. Primary funding sources for Mat-Su Valley Planning for Transportation include membership fees, dues, and reimbursement for expenses from the State of Alaska Department of Transportation and Public Facilities. Mat-Su Valley Planning for Transportation also receives membership fees and dues from the Mat-Su Borough, City of Wasilla, City of Palmer, Chickaloon and Kink Tribe.

Basis of Accounting

Mat-Su Valley Planning for Transportation's financial statements are presented on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Under this method of accounting, revenues are recognized when earned. Liabilities and expenses are recorded when incurred.

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor or grantor imposed restrictions. Accordingly, net assets and changes therein are classified and reported as follows:

Net Assets Without Donor Restrictions – Net assets available for use in general operations and not subject to donor (or certain grantor) restrictions. The governing board has designated, from net assets without donor restrictions, net assets for an operating reserve.

Net Assets With Donor Restrictions – Net assets subject to donor- (or certain grantor-) imposed restrictions. Some donor-imposed restrictions are temporary in nature, such as those that will be met by the passage of time or other events specified by the donor. Other donor-imposed restrictions are perpetual in nature, where the donor stipulates that resources be maintained in perpetuity. Gifts of long-lived assets and gifts of cash restricted for the acquisition of long-lived assets are recognized as revenue when the assets are placed in service. Donor-imposed restrictions are released when a restriction expires, that is, when the stipulated time has elapsed, when the stipulated purpose for which the resource was restricted has been fulfilled, or both.

Use of Estimates

Management of the Organization uses estimates and assumptions in preparing these financial statements in accordance with accounting principles generally accepted in the United States of America. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that are used.

PRELIMINARY DRAFT
FOR DISCUSSION PURPOSES ONLY

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Notes to Financial Statements, Continued

Allocation of Costs

The costs of providing various programs and other activities have been summarized on a functional basis on the face of the financial statements. Accordingly, certain costs have been allocated among the program services and supporting activities benefited. This required the allocation of costs among the various program services and supporting services is based on estimates made by management.

Description of Program Services and Supporting Services

The following program services and supporting services are included in the accompanying financial statements:

Program Services – Accounts for the activities associated with the administration and operation of the Unified Planning Work Program (Transportation Projects).

Supporting Activities:

Management and General – Accounts for all the activities of the Organization that are not directly identifiable with the programs noted above. These costs account for the activities associated with managing the Organization and the above programs.

Allocation of Functional Expenses

The financial statements report certain categories of expenses that are attributed to more than one program or supporting function. Therefore, expenses require allocation on a reasonable basis that is consistently applied. The expenses that are allocated include salaries and wages, and contract services

Cash and Cash Equivalents

For purposes of the Statements of Cash Flows, the Organization considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

Accounts Receivable, and Allowance for Credit Losses

Accounts and grants receivable are stated at the amount management expects to collect from outstanding balances. The estimation of losses considers prior charge-offs and recoveries against the allowance for credit losses as well as the historical loss information, economic conditions, character of the credit risk and reasonable and supportable forecasts. There was no allowance for credit losses as of September 30, 2025 as all grants receivable are deemed to be fully collectible.

Property and Equipment

Purchased assets are recorded at cost or estimated cost when original cost is not available. Contributed assets are recorded at the estimated fair value at the date of receipt. Furniture and equipment purchases are reported as expenses when used for reimbursement from granting agencies and capitalized for financial statement purposes if the assets are greater than \$1,000 with a useful life greater than one year. These assets are depreciated over their useful lives using the straight-line method. Useful lives of assets vary from 3 years for equipment to 40 years for buildings and building improvements.

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Notes to Financial Statements, Continued

Unearned Revenue

Unearned revenue represents amounts for which asset recognition criteria have been met, but for which revenue recognition criteria have not been met.

Fair Value of Financial Instruments

The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction into principal, or the most advantageous, market at the measurement date under current market conditions regardless of whether the price is directly observable or estimated using another valuation technique. Fair values are based on quoted market prices when available.

The following financial instruments are recorded at fair value or at amounts that approximate fair value: (1) cash and cash equivalents, including restricted cash and funded reserves (2) receivables, net, (3) certain other current assets, (4) accounts payable and (5) other current liabilities. The carrying amounts reported in the Statements of Financial Position for the above financial instruments closely approximates their fair value due to the short-term nature of these assets and liabilities.

Revenue Recognition

Grant Revenues

All of the Organization's revenue is derived from cost-reimbursable state grants and contracts, which are conditional upon certain performance requirements and/or the incurrence of allowable qualifying expenses and have a right of return. Amounts received prior to incurring qualifying expenses are reported as refundable advances on the Statements of Financial Position.

Membership Dues

Membership dues are typically paid at the beginning of the membership term and are non-refundable. Under ASC 606, Revenue from Contracts with Customers, membership dues are evaluated to determine which components represent distinct performance obligations. The Organization has concluded that the membership benefits collectively represent a single performance obligation satisfied ratably over the membership period, as members receive access to benefits throughout the year and no individual benefit is considered separately material. Accordingly, membership dues are recognized as revenue on a straight-line basis over the 12-month membership term, regardless of when cash is received. Amounts collected in advance of the membership period are recorded as Deferred Revenue on the Statement of Financial Position. At December 31, 2025 unearned revenue related to membership dues was \$8,169.

Income Taxes

Mat-Su Valley Planning for is a nonprofit corporation exempt from income taxation under Section 501(c)(3) of the Internal Revenue Code.

Although the Organization is exempt from federal income taxes, any income derived from unrelated business activities is subject to the requirement of filing Federal Income Tax Form 990-T and a tax liability may be determined on these activities. The Organization had no income derived from unrelated business activities as of September 30, 2025.

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Notes to Financial Statements, Continued

The Organization classifies all interest and penalties related to tax contingencies as income tax expense. As of September 30, 2025, there is no accrued interest or penalties. As of September 30, 2025 there were no uncertain tax positions or unrecognized tax benefits for which management believes it is reasonably possible that the total amounts of tax contingencies will significantly increase or decrease within 12 months of the reporting date. The Organization files tax returns in the US Federal Jurisdiction and the State of Alaska. As of 2025, the tax years that remain subject to examination begins with 2025. The Organization is not under examination by the internal revenue service for any open tax years.

(2) **DEPOSITS WITH FINANCIAL INSTITUTIONS**

The Organization maintains a checking, savings and money market accounts with Matanuska Valley Federal Credit Union of Alaska. FDIC insures these accounts up to \$250,000. Currently, the Organization has no policy that dictates deposits be collateralized for amounts in excess of FDIC coverage. At September 30, 2025, the Organization’s uninsured bank balances total \$271,654. Management believes the banking institution where it has its deposits is secure and has accepted the risks associated with their deposits.

(3) **LIQUIDITY AND AVAILABILITY**

Financial assets available for general expenditure, that is, without donor or other restrictions limiting their use, within one year of the Statement of Financial Position date, comprise the following:

Cash and cash equivalents	\$	522,154
Grants receivable		<u>83,867</u>
	\$	<u>606,021</u>

(4) **PROPERTY AND EQUIPMENT**

The following is a summary of property and equipment at September 30:

		<u>2025</u>
Equipments	\$	2,559
Accumulated depreciation		<u>(355)</u>
Net property and equipment	\$	<u>2,204</u>

Depreciation expense was \$355 for the year ended September 30, 2025

(5) **EMPLOYEE BENEFIT PLAN**

Mat-Su Valley Planning for Transportation provides 401(k) Retirement Savings Plan for employees with two parts.

MAT-SU VALLEY PLANNING FOR TRANSPORTATION

Notes to Financial Statements, Continued

First, beginning at the start of their employment with the organization, an employee may contribute a portion of their salary to their 401(k) account up to the maximum amount contributable under IRS regulations. They are entitled to the entirety of their contribution upon separation.

Second, beginning at the start of their employment, with the employees first paycheck, MVP for Transportation shall contribute an equivalent of 3% of an employee's gross wages to their 401(k) account. The Policy Board shall review the amount of the employer contribution annually.

For the years ended September 30, 2025, the Organization's contribution to this plan was \$2,270.

(6) CONTINGENCIES

The Organization receives grants, which are subject to audit and adjustments by the grantor agencies. Any disallowed claims, including amounts already collected, would become a liability of the Organization; however, the Organization does not anticipate any disallowed costs.

In the normal course of business, liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

(7) CONCENTRATION OF SUPPORT

During the year ended September 30, 2025, 40% of revenue was derived from state grants, 23% was derived from federal grants and 37% was derived from membership fees.

A significant reduction in the level of these sources of support and revenue, if this were to occur, may have an adverse effect on the Organization's programs and activities.

(8) SUBSEQUENT EVENTS

The Organization has evaluated subsequent events through MONTH XX, 2026, the date on which the financial statements were available to be issued. No items were deemed necessary for disclosure.

Department of Transportation & Public Facilities
Data Modernization & Innovation Office
Phone: 907-451-2283

MEMORANDUM

TO: Ryan Anderson, P.E.
Commissioner

DATE: June 30, 2025

THRU: Katherine Keith ^{Initial} KK
Deputy Commissioner

Christine Langley ^{DS} CL
Director, Data Modernization & Innovation Office

FROM: Pam Golden, P.E.
State Traffic & Safety Engineer

SUBJECT: 2026 HSIP Safety
Performance Measure
Target Recommendations

The Performance Measure Target work group, comprised of regional planning staff, regional and statewide traffic & safety staff, and representatives of Alaska’s three Municipal Planning Organizations have completed their review of external factors, trend analysis, conformance to federal regulations¹, and the Strategic Highway Safety Plan. The work group is once again recommending the Highway Safety Improvement Program (HSIP) targets be set to be consistent with the goal of the Strategic Highway Safety Plan of zero Alaska roadway fatalities by 2050. The following safety performance management targets are recommended by the work group for inclusion in the 2026 HSIP annual report:

Performance Measures	2026 HSIP Target
Fatalities	≤ 59.3
Fatality Rate (per HMVMT*)	≤ 1.074
Serious Injuries	≤ 264.7
Serious Injury Rate (per HMVMT*)	≤ 4.819
Non-motorized fatalities and non-motorized serious injuries (combined)	≤ 45.8

*HMVMT – hundred million vehicles miles traveled

The targets, expressed as five-year rolling averages, are applicable to all public roads in the State, and satisfy the requirements for the Alaska Department of Transportation and Public Facilities under US 23 CFR 490 Subpart B.

¹ Namely: “States must set performance targets that demonstrate constant or improved performance.”

Approved:  Signed by:
Ryan Anderson, P.E. Commissioner

Date: 7/23/2025

Performance Planning Target Setting Procedures

This procedure will ensure standardized information and will assist in improved monitoring and auditing of federal transportation funds, and will ensure the requirements of 23 CFR 450.314 (h) are met.

On May 27, 2016, the final rule for statewide and metropolitan transportation planning was published, based on 2012's Moving Ahead for Progress in the 21st Century (MAP-21) Act and 2015's Fixing America's Transportation System (FAST) Act. As part of this final rule, 23 CFR 450.314 (h) was amended to state:

(1) The MPO(s), State(s), and the providers of public transportation shall jointly agree upon and develop specific written provisions for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward attainment of critical outcomes for the region of the MPO (see § 450.306(d)), and the collection of data for the State asset management plan for the NHS for each of the following circumstances:

(i) When one MPO serves an urbanized area;

(ii) When more than one MPO serves an urbanized area; and

(iii) When an urbanized area that has been designated as a TMA overlaps into an adjacent MPA serving an urbanized area that is not a TMA.

(2) These provisions shall be documented either:

(i) As part of the metropolitan planning agreements required under paragraphs (a), (e), and (g) of this section; or

(ii) Documented in some other means outside of the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation.

The following approach is being cooperatively proposed between the Alaska Department of Transportation and Public Facilities (DOT&PF) and the State's Metropolitan Planning Organizations (MPO), the Anchorage Metropolitan Area Transportation Solutions (AMATS), Fairbanks Area Surface Transportation (FAST), and MatSu Valley Planning For Transportation (MVP) to address 23 CFR 450.314 (h).

The DOT&PF, AMATS, FAST, and MVP agree to the following provisions. The communication outlined in these provisions between the DOT&PF and the MPOs will generally be through the DOT&PF MPO Coordinators, DOT&PF Statewide Urban Planning Chief, the AMATS Executive Director, the MVP Executive Director, and the FAST Executive Director.

1) Sharing of transportation performance data

- a. At the request of the MPOs, DOT&PF will provide each MPO with the statewide performance data and will also provide each MPO with subsets of the statewide data, based on their planning area boundaries and population-based classification. Updates of this data will include prior performance data, if applicable.
- b. If MPOs choose to develop their own target for any measure, they will provide DOT&PF with any supplemental data they use in their target setting process.
- c. Providers of public transportation (railroad and bus transit) are represented by the MPOs and will submit their performance data directly to the MPOs. The DOT&PF may request a copy of this data at any time.

2) Selection of performance targets

- a. DOT&PF will develop draft statewide performance targets in coordination with the MPOs. Coordination may include in-person meetings, virtual meetings, conference calls, and/or email communication. The MPOs shall be given an opportunity to provide comments on statewide targets before final statewide targets are adopted by the DOT&PF. Final targets will be communicated to the MPOs.
- b. If an MPO chooses to adopt their own target for any measure, they will develop draft MPO performance targets in coordination with DOT&PF. Coordination methods will be at the discretion of the MPO, but DOT&PF will be provided an opportunity to comment on the draft MPO performance targets prior to final approval by the MPO. Final targets will be communicated to DOT&PF.
- c. Providers of public transportation will be responsible for selecting their own performance targets and submitting them to the MPOs for record-keeping purposes. The MPOs will share these targets with the DOT&PF at their request.
- d. Some performance targets may only be applicable within Transportation Management Areas (TMAs).
- e. Some performance targets may only be applicable within Air Quality Non-Attainment or Maintenance Areas.

3) Reporting of performance targets and data

- a. DOT&PF performance targets will be reported to the FHWA. The MPOs will be notified via email when DOT&PF has reported final statewide targets.
- b. MPO performance targets will be reported to the DOT&PF MPO Coordinators.
 - i. For each target, the MPO will provide the following information no later than 180 days after the date DOT&PF reports performance targets to the FHWA, or the date specified by federal code.
 - 1. A determination of whether the MPO is 1) agreeing to plan and program projects so that they contribute toward the accomplishment of the DOT&PF performance target, or 2) setting a quantifiable target for that performance measure for the MPO's planning area.
 - 2. If a quantifiable target is set for the MPO planning area, the MPO will provide any supplemental data used in determining any such target.
 - 3. Documentation of the MPO's target or support of the statewide target will be provided in the form of a resolution or meeting

minutes of the MPO submitted to the DOT&PF MPO Coordinators.

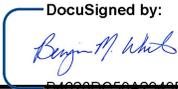

4. The MPO will identify within the TIP those projects which support the performance targets in accordance with 23 CFR § 450.326.
- c. DOT&PF will include information outlined in 23 CFR 450.216 (f) in any statewide transportation plan amended or adopted after May 27, 2018, and information outlined in 23 CFR 450.218 (q) in any statewide transportation improvement program amended or adopted after May 27, 2018.
- d. MPOs will include information outlined in 23 CFR 450.324 (f) (3-4) in any metropolitan transportation plan amended or adopted after May 27, 2018, and information outlined in 23 CFR 450.326 (d) in any transportation improvement program amended or adopted after May 27, 2018.
- e. MPOs will annually report their safety performance targets in the form of a resolution, or meeting minutes of the MPO, or System Performance Report update in accordance with 23 CFR 490.213. MPOs may also include progress toward targets in this annual update.
- f. Reporting of performance targets and data by DOT&PF and the MPOs shall conform to 23 CFR 490.

4) Collection of data

- a. The DOT&PF will be responsible for:
 - i. Safety: Collection of fatality and serious injury data on all public roads.
 - ii. Bridge & Pavement: Collection of condition data on the Interstate & Non-Interstate National Highway System.
 - iii. Travel Time: Download, evaluation and preparation of the National Performance Measure Research Data Set (NPMRDS), the speed and travel time data sets provided by FHWA.
 - iv. Congestion Mitigation and Air Quality: Annual Hours of Peak Hour Excessive Delay Per Capita, also known as PHED; Percent of Non-Single Occupancy Vehicle travel, also known as Non-SOV Travel; and Total Emissions Reduction.
- b. MPO will be responsible for the following:
 - i. Notify the DOT&PF if they choose to use their own performance or condition data and if they choose to start collecting data in response to the federal performance management requirements.
 - ii. If the MPO will be collecting their own data, the MPO will provide an annual update of performance data to the DOT&PF MPO Coordinators for integration into statewide performance reporting requirements.
 - iii. Collecting and recording data from the providers of public transportation represented by the MPOs.

I declare to the best of my knowledge and ability that we will adhere to the above requirements.

MEMORANDUM OF UNDERSTANDING (MOU)

BETWEEN

THE ALASKA DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES (DOT&PF), THE ANCHORAGE METROPOLITAN AREA TRANSPORTATION SOLUTIONS (AMATS), FAIRBANKS AREA SURFACE TRANSPORTATION (FAST), AND MATSU VALLEY PLANNING FOR TRANSPORTATION (MVP)

1. **PURPOSE AND SCOPE.** The purpose of this MOU is to support a performance-based approach to the metropolitan transportation planning and programming process as specified in 23 USC 134 (h)(2), 23 USC 135(d)(2), 49 USC 5303(h)(2), 49 USC 5304(d)(2), 23 CFR 450.206(c), 23 CFR 450.314(h), and 49 CFR 613.
2. **RESPONSIBILITIES.** To the extent practicable, DOT&PF, AMATS, FAST, and MVP will work cooperatively to:
 - 2.1. Develop and share information related to transportation performance data.
 - 2.2. Select performance targets.
 - 2.3. Promptly report performance targets whenever a target is adopted or changed.
 - 2.4. Follow the specific procedures identified in the most current version of the Performance Planning Target Setting Procedures document. **See Attached**
3. **CONTRACTUAL OBLIGATIONS.** This MOU is not a legally binding agreement and creates no legally binding obligations for any party. Any party may, upon written notice, amend or discontinue its role outlined in the MOU. Because of this mutual desire to proceed, each party fully intends to make a good faith effort to achieve the goals described above, including working together to comply with federal and state laws.
4. **DATA SHARING.** The parties acknowledge that this MOU, as well as any data created, collected, stored, or received under the terms of this MOU, are considered public data, with the exception of personal information protected by law, and shall be openly shared between the two parties for carrying out the purposes of this federal mandate.
5. **EFFECTIVE DATE.** This MOU shall be effective when all appropriate signatures have been obtained by DOT&PF, AMATS, FAST, and MVP.
6. **MODIFICATION.** Any amendments to this MOU must be mutually agreed to in writing.
7. **TERMINATION.** The terms of this MOU may be terminated by any one of the signatory parties by giving 90 days written notice to each of the other parties. This MOU will remain in effect until terminated as provided in this clause, or until amended or replaced by a new MOU.

I concur with this Memorandum of Understanding

Electronic Record and Signature Disclosure
--

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

Please read this Electronic Records and Signature Disclosure (ERSD). It concerns your rights regarding electronically undertaking, and the conditions under which you and the State of Alaska agree to electronically undertake, the transaction to which it relates (the “TRANSACTION”).

Consent to Electronically Undertake the TRANSACTION

You can electronically undertake the TRANSACTION only if you confirm that you meet the following requirements by selecting the box next to “I agree to use electronic records and signature” (the “AGREE BOX”):

1. you can fully access and have read this ERSD;
2. you can fully access all of the information in the other TRANSACTION records;
3. you can retain all of the TRANSACTION records in a form that you will be able to fully access for later reference;
4. you consent to undertake the TRANSACTION electronically; and
5. you are authorized to undertake the TRANSACTION. (Please note that falsely undertaking the TRANSACTION may subject you to civil liabilities and penalties and/or to criminal penalties.)

If you cannot or are not willing to confirm each of these five things, do not select the AGREE BOX.

Withdrawing Consent

If you select the AGREE BOX, you can withdraw your consent to electronically undertake the TRANSACTION at any time before you complete the TRANSACTION: simply do not finalize it. The only consequence of withdrawing your consent is that you will not finalize the TRANSACTION.

If you select the AGREE BOX, your consent will apply only to this TRANSACTION. You must separately consent to electronically undertake any other transaction with the State of Alaska.

Paper Option for Undertaking the TRANSACTION

You may undertake the TRANSACTION with the State of Alaska using paper records. (State of Alaska employees who want to undertake the TRANSACTION in paper should contact the agency responsible for the TRANSACTION.) Print the paper records on the website of the State of Alaska agency responsible for the TRANSACTION, or request them from the agency. The State of Alaska homepage is at <http://alaska.gov/>.

Copies of TRANSACTION Records

After completing the TRANSACTION but before closing your web browser, you should download the TRANSACTION records. Or you can download the records within 30 days after

completing the TRANSACTION using the link in the DocuSign email sent to the email address you used to complete the TRANSACTION. The State of Alaska will not provide a paper copy of the TRANSACTION records as part of the TRANSACTION. Under the Alaska Public Records Act (APRA), AS 40.25.100–.295, you can request a copy from the agency responsible for the TRANSACTION, but if too much time has passed, the agency may no longer have the records when you make your request. If required under the APRA, the agency will charge a fee.

Required Hardware and Software

For the minimum system requirements to electronically undertake the TRANSACTION, including accessing and thereby retaining the TRANSACTION records, visit <https://support.docusign.com/guides/signer-guide-signing-system-requirements>. These requirements may change. In addition, you need access to an email account.

How to Contact the State of Alaska

To ask a question on this ERSD or the DocuSign document generated after you complete the TRANSACTION or on using DocuSign to electronically undertake the TRANSACTION, contact the Alaska Department of Administration at either of the following addresses:

State of Alaska
Department of Administration
550 West 7th Avenue
Suite 1970
Anchorage, AK 99501
Reference: DocuSign

doa.commissioner@alaska.gov
Subject: DocuSign

To ask any other question on the TRANSACTION records or to update the information for contacting you electronically, contact the State of Alaska agency responsible for the TRANSACTION using the contact information in the TRANSACTION records or, if those records contain no contact information, using the contact information on the agency's website. Again, the State of Alaska homepage is at <http://alaska.gov/>.

MATSU VALLEY
PLANNING *for*
TRANSPORTATION

Metropolitan Transportation Plan

Formal Project Nomination Process Information

**January
2026**

Introduction

MatSu Valley Planning for Transportation (MVP) is the federally designated Metropolitan Planning Organization (MPO) for the Matanuska-Susitna (Mat-Su) Valley.

A key responsibility of the MPO is the preparation of a long-range Metropolitan Transportation Plan (MTP). The MTP looks at current transportation system conditions and future needs over the next 20+ years and establishes goals and objectives to ensure that the development of the Mat-Su's transportation systems is responsive to the community's vision for economic development, sustainability, and quality of life.

Central to the MTP process is the creation of a prioritized list of transportation projects to guide the investment of federal funds across the Mat-Su's transportation network, including roads, transit systems, freight, and nonmotorized facilities. Projects must be included in the MTP in order to be eligible for federal funding.

This packet provides project nominators with the information needed to successfully navigate the formal project nomination process. Projects received during the formal project nomination period will be reviewed, evaluated, and prioritized by MVP for potential inclusion in the MTP.

What's Included in this packet?

Attachment 1

Vision, Goals, and Objectives

Developed as part the MTP process, the vision, goals, and objectives provide the framework for what we want to achieve with our transportation system and how we plan to get there.

Attachment 2

Nomination Form Questions

Summarizes the required questions that project nominators must answer as part of the project nomination form.

Attachment 3

Project Evaluation Scoring Guide

Outlines the process and methodology that MVP will use to evaluate and score projects nominated for inclusion in the MTP.

Key Information

When:

The formal project nomination period opens on **January 28, 2026** and will run for a minimum of 30-days.

Where:

All project nominations must be submitted through the online project nomination form to be considered. The project nomination form can be accessed at this link:

[Project Nomination Form](#)

Who:

Anyone may submit a project for consideration.

What:

The MTP can and should include a range of different types of projects. Projects eligible for federal funding might include but are not limited to road and bridge rehabilitation projects, road extension projects, improvements and facilities for nonmotorized users (e.g., bike paths and crosswalks), transit improvements, and transportation studies.

Successful projects must clearly explain what is being proposed, how the project would help address current transportation challenges or community concerns raised during the MTP process, and how it fits with existing transportation and land use plans in the Mat-Su.

At this point in the project nomination process, it is not necessary to know exactly how much a given project will cost or when it would occur. However, federal regulation requires the MTP project list to be fiscally constrained so including a rough cost estimate will help MVP to prioritize projects.

Questions?

For additional information and questions about the nomination process, please send an email to info@mvpmpo.com.

If you are experiencing issues with the mechanics of the form and data entry, please contact Mackenze Origer at Mackenze.origer@matsugov.us.

Attachment 1

Vision, Goals & Objectives

Vision

MatSu Valley Planning for Transportation is committed to creating a safe, efficient, and multimodal transportation system that fosters reliable and accessible options for all modes of travel, supports the economy and environment, and promotes healthy communities.

Goals

Ensure transportation improvements align with local land use patterns and connect housing to employment

- ◆ Improve coordination between transportation planning and local land use plans to ensure consistency between transportation projects and community development patterns
- ◆ Enhance multimodal connections between residential areas and employment hubs
- ◆ Prioritize transportation investments that maximize network efficiency based on local growth patterns

Improve transportation safety for all modes

- ◆ Utilize data-driven safety analysis to identify high risk locations
- ◆ Increase safety education programs
- ◆ Reduce the number and severity of crashes at high-risk locations

Leverage all available funding resources

- ◆ Diversify funding streams by working with local, state, federal, and tribal partners to utilize all available formula funding
- ◆ Increase applications for competitive grants year-over-year
- ◆ Educate MPO membership and the community about funding opportunities

Maintain the system in a state of good repair

- ◆ Utilize data-driven asset management principles and establish a preventative maintenance program
- ◆ Strengthen collaboration with maintenance entities to provide consistent, year-round maintenance
- ◆ Increase public outreach to identify maintenance needs
- ◆ Prioritize an annual allocation of funding for preservation and rehabilitation projects

Create opportunities for more diverse transportation options

- ◆ Utilize transportation data analyses for gap and need assessments
- ◆ Strengthen collaboration between transportation providers and stakeholders and increase public outreach and communication
- ◆ Identify potential multimodal corridors and build infrastructure for all user groups
- ◆ Support the implementation of the Transit Asset Management plan to guide investment in transit facilities

Shorten commute times and improve mobility

- ◆ Identify and remove network gaps for all modes
- ◆ Decrease congestion by building capacity, improving operational efficiency, and increasing transportation choices
- ◆ Increase connectivity for all modes

Build a resilient transportation network

- ◆ Provide transportation solutions that enhance the natural environment
- ◆ Integrate stormwater management into infrastructure design
- ◆ Increase the resiliency of the transportation infrastructure to natural and manufactured hazards

Objectives

Attachment 2

MVP MTP Project Nomination Questions

This document summarizes the required questions that project nominators must answer as part of the project nomination form. Questions are categorized by general topic and generally correlate to the evaluation criteria developed by MVP for the purposes of scoring and prioritizing projects to be included in the MTP.

All project nominations must be submitted using the online form:
<https://survey123.arcgis.com/share/687f471e7665469aa9bb6b2e51fe2b8b?portalUrl=https://msb.maps.arcgis.com>

Please note that a form must be submitted for each unique project. Only projects that are 1) located within the Metropolitan Planning Area (MPA) boundary and 2) eligible for FHWA funds will be considered for potential inclusion in the MTP.

Project Location

A point location must be provided for all projects. The point must be within the MPA boundary and should reflect the approximate location of the proposed project area.

Provide a brief description of your project location including nearest cross streets.

Submitter Information

Organization Name (Individual/ Agency/ Organization/Unaffiliated):

Contact Name:

Contact Phone:

Contact Email:

Project Information

Project Name:

Project Type:

(Check all that apply project)

- Roadway Capacity – Y/N
- Roadway Maintenance / Reconstruction – Y/N
- Transit (Bus / Rail) – Y/N
- Bicycle / Pedestrian – Y/N
- Freight / Goods Movement – Y/N
- Safety – Y/N
- Technology / Intelligent Transportation Systems (ITS) – Y/N
- Planning / Study – Y/N
- New Corridor – Y/N
- Bridge – Y/N
- Other: _____

Project Description (narrative):

Funding and Project Readiness

1. Estimated project cost (enter 0 if unknown or not available).
2. Are there existing identified funding sources for this project?
 - If yes, please provide a narrative description of the source of funding.
3. Project Phases Being Nominated:
 - Planning/Study
 - Preliminary engineering
 - Right-of-Way
 - Construction
 - Operations/Maintenance
4. Anticipated Schedule

Land Use Integration

5. Is the project included in an existing land use or transportation plan?
 - If yes, please enter the name of the plan.
6. Does the project include or is it contained within a corridor identified in an access management plan?
7. Provide a brief description of how your project would improve access to employment, education, healthcare, or other key destinations.

Improving Network Safety

8. Is the project included in an existing safety plan?
 - If yes, please provide the plan name.
9. Does your project implement safety design features (e.g., improved lighting, signage, speed reduction, or crossings) or address documented safety issues?
 - If yes, please provide details.

Supports System Maintenance

10. Does your project address pavement or bridge condition issues?
 - If yes, please provide details.
11. Does your project improve operations?
 - If yes, please provide details.
12. Does your project directly address an area with a known record of public complaints?
 - If yes, please provide details.

Supports More Diverse Transportation Options

13. Is the project included in the MSB Bike and Pedestrian plan?
14. Does your project support multi-modal transportation?
 - If yes, please provide details.
15. How does your project support transit facilities? (select one)
 - It would add new or improve transit facilities
 - It would maintain existing transit facilities
 - It would have no effect on transit facilities
16. Does your project reduce user group conflicts?
 - If yes, please provide details.

Supports Network Resiliency and Environmental Considerations

17. Does your project reduce the vulnerability of transportation facilities?
 - If yes, please provide details.
18. Does your project include features to enhance or protect the natural environment?
 - If yes, please provide details.
19. Does your project improve emergency response?
 - If yes, please provide details.

Public Agency Support

20. Has a governing body or local agency formally endorsed the project?
 - If yes, please attach a document¹ of endorsement.

¹ File size limit of 100 mb.

Attachment 3

Metropolitan Transportation Plan (MTP) Project Evaluation and Scoring Methodology

Introduction

This document outlines the process and methodology used by MatSu Valley Planning for Transportation (MVP) to evaluate and score transportation projects nominated for inclusion in the Metropolitan Transportation Plan (MTP). This evaluation framework provides a consistent, transparent, and data-driven approach to prioritizing investments that advance regional goals and meet federal performance-based planning requirements. It is intended to support both project sponsors during the submission process, as well as project evaluators.

Objectives of the evaluation process include:

- Ensuring fair and transparent project selection.
- Supporting regional goals for safety, integration with land use, and resilience, among others.
- Linking planning and programming (MTP → Transportation Improvement Program).

Framework for Evaluation

The evaluation framework aligns with federal performance goals under Moving Ahead for Progress in the 21st Century (MAP-21), the Fixing America’s Surface Transportation (FAST) Act, and the Infrastructure Investment and Jobs Act (IIJA). It ensures that project selection supports regional transportation goals and objectives.

Types of evaluation criteria include:

- Quantitative/Objective – measurable, data-based metrics such as safety performance or asset condition improvement.
- Qualitative/Subjective – context-based assessments such as consistency with land use plans or community priorities.

Quantitative criteria are referred to in this document as **Scored Programmatically**. The project sponsor does not need to submit this information with the project nomination as MVP staff will use GIS and other

tools to determine the score. These programmatically scored criteria are delineated with a 📊 in this guide.

Qualitative information will need to be submitted by the project sponsor and scored by the MTP scoring committee. The MTP scoring committee includes members of the MVP Technical Committee and MVP staff. Criteria that require the project sponsor to submit evidence of meeting the criterion are denoted with a 👤 in this guide.

Scoring Process Overview

MVP's evaluation and scoring process will include the following steps:

1. **Data Compilation:** MPO staff or consultants collect datasets, modeling outputs, and plan references.
2. **Project Submission:** Sponsors submit proposals with supporting documentation.
 - a. **Initial Screening:** projects are screened to ensure they fit the program, include everything necessary for evaluation, and have budgets that fit within MVP's resources.
3. **Criteria Scoring:** Each project is scored by each member of the MTP scoring committee using standardized scales (e.g., 1–5).
4. **Composite Scoring and Weighting:** Scores are weighted and summed to produce a total score.
5. **Review and Validation:** Scores undergo internal and committee review. Evaluators may reach out to sponsors for clarification.
6. **Ranking and Recommendation:** Projects are prioritized for inclusion in the MTP and for TIP programming.
7. **Public Review:** The draft MTP will be put out for public review and comment.

Evaluation Criteria and Scoring Guidance

- ❖ **Goal Area 1:** Ensure transportation improvements align with land use patterns and connect housing to employment.
-

Land use compatibility assesses how well a proposed transportation project aligns with existing and planned land uses, local comprehensive plans, and regional growth patterns.

Projects that are land-use compatible reinforce desired development patterns, support sustainable growth, and improve accessibility to activity centers, rather than conflicting with land use goals or degrading sensitive areas.

CRITERION 1.1: consistent with adopted plans and local land use policies

 How to score:

- 3 points if the project is included in an adopted plan; do not consider Safety Plans since they are included in the next goal area (Safety)
- If the project is NOT included in a plan, 0 points

Project sponsor to provide the name of the plan. Examples of acceptable plans include but are not limited to Borough Wide Comprehensive Plan, Community Council Comprehensive Plans, MSB LRTP, Special Use District (SPUD) plan, Transit Plan, or Official Streets & Highways Plan.

CRITERION 1.2: improves access to employment, education, healthcare, or other key destinations

 How to score:

- 0 points if the project would not improve access to employment, education, healthcare, or other key destinations
- 3 points if the project would minimally improve access (the project sponsor should provide evidence of how the project meets this criterion)
- 5 points if the project focuses on improving access (i.e., the project's primary goal is to provide access to employment, education, or healthcare; the project sponsor will provide the evidence of this in the submission)

Project sponsor will provide the evidence of improved access as part of the project description.

CRITERION 1.3: includes right-of-way (row) or access management components that coordinate with land use

 How to score:

- 3 points if the project is included in an access management plan
- 0 points if the project is NOT included in an access management plan

Project sponsor to provide the name of the access management plan. The Bogard-Seldon Access Management Plan is an example of an access management plan.

❖ **Goal Area 2:** Improve transportation safety for all modes.

Projects that improve safety for all users (motorists, cyclists, pedestrians, etc.) support quality of life and help prevent crashes or injuries.

CRITERION 2.1: addresses a high crash location or issue

 How to score (scored programmatically with the Equivalent Property Damage Only [EPDO] analysis layer in GIS):

- 5 points if the project is on a road/corridor/intersection with an EPDO score in the top 20th percentile
- 3 points if the project is on a road/corridor/intersection with an EPDO score in the 60th-80th percentile
- 1 point if the project is on a road/corridor/intersection with an EPDO score in the 40th-60th percentile
- 0 points if the project does not have an associated EDPO score (i.e., not applicable to the project type)

Project sponsor does not provide documentation for this criterion.

CRITERION 2.2: identified need in a safety plan

 How to score:

- 3 points if the project is in a safety plan
- 0 points if the project is not in a safety plan

Project sponsor to provide the name of the safety plan; examples include Safe Routes to School, Community Safety Action Plan, School Walking Routes; other plans may be considered if the project sponsor provides the name of the plan and section that references the project.

CRITERION 2.3: implements safety design features¹ / addresses a documented² issue

 How to score:

- 3 points if the project implements safety features or addresses a documented issue for all modes
- 1 point if the project implements safety features or addresses a documented issue for one mode
- 0 points if the project does not include safety features

¹*Project sponsor to provide a description of the safety features in the project description and what modes are addressed; for purposes of scoring this criterion, modes include motor vehicles, pedestrians, and cyclists; examples of safety features include but are not limited to items such as guardrails, lighting, traffic calming (e.g., speed humps), intersection realignments, sight distance improvements, enhanced pedestrian crossings (e.g., rectangular rapid flashing beacons), or early warning flashers.*

²*Project sponsor to provide the source of the documented issues; the source may be a study, report, analysis, or other technical assessment; public comments/complaints are not considered when evaluating this criterion as that metric is scored elsewhere.*

CRITERION 2.4: within ½-mile of a school, senior center, senior housing, or playground

 How to score (scored programmatically with GIS by using a ½-mile buffer around the project location):

- 1 point if the project meets the criterion (one of the listed facilities falls within the ½-mile buffer)
- 0 points if the project does not meet the criterion

❖ **Goal Area 3:** Leverage all available funding resources.

Projects with funding identified and allocated are closer to implementation than those without funding. Most federally funded projects require a local match. Identifying that match early helps keep a project on schedule.

CRITERION 3.1: project funding has been allocated

 How to score:

- 3 points if match funding has been secured
- 0 points if no match funding has been secured

Project sponsor to provide evidence of funding through a resolution or budget line item that identifies the project and the amount of funding dedicated to it. Projects that are early in the development process are unlikely to have funding.

❖ **Goal Area 4:** Maintain the system in a state of good repair.

Maintenance of transportation facilities is important to support quality of life, facilitate economic development, reduce crashes, and protect transportation investments.

CRITERION 4.1: improves asset condition

 How to score:

- 5 points if the project addresses pavement or bridge conditions
- 0 points if the project does not address pavement or bridge conditions

Project sponsor will provide evidence of the improvement in the project description. For example, they may indicate that a road's IRI value will decrease after the project is completed.

CRITERION 4.2: improves operations

 How to score:

- 5 points if the project improves operations
- 0 points if the project does not improve operations

Project sponsor will provide the improvements to operations in the project description. Examples include replacing streetlights, adding stoplights, incorporating Intelligent Transportation Systems (ITS). Projects that get a 'yes' on this criterion generally include elements that improve how the transportation network operates.

CRITERION 4.3: addresses public complaints

 How to score:

- 3 points if there is a record of public complaints
- 0 points if there no record of public complaints

Project sponsor to provide the source of the recorded complaints. The Matanuska Susitna Borough's (MSB) "problem reporter" is an example of a source of recorded public complaints. Other sources of complaints may include letters from community or user groups or comments submitted at public meetings or through online forms.

❖ **Goal Area 5:** Create opportunities for more diverse transportation options.

A transportation system with diverse transportation options allows people of different economic, social, and demographic backgrounds to move about the MPA.

CRITERION 5.1: project upgrades/adds non-motorized facilities

 How to score:

- 5 points if the project adds facilities recommended in the MSB Bicycle & Pedestrian Plan (BPP)
- 3 points if the project is not in the BPP but would add or improves other transit, bicycle, or pedestrian facilities
- 1 point if the project is not in the BPP but would maintain existing facilities
- 0 points if the project does not add or improve non-motorized facilities

Project sponsor to indicate if the project is in the BPP; if the project is not in the BPP but the project sponsor feels that it improves non-motorized or transit facilities, then the project sponsor shall include a description of the improvements; if the project maintains a facility without any additional improvements, the project sponsor shall indicate what maintenance is expected.

CRITERION 5.2: closes a gap in the multi-modal network

 How to score:

- 5 points if the project connects two facilities or extends a facility
- 0 points if the project would result in no change

The project sponsor must describe the project termini and indicate what connection or which facilities the project is connecting or extending. This criterion evaluates non-motorized connections only. For roadway network gaps, see Criterion 6.3.

CRITERION 5.3: supports transit

 How to score:

- 5 points if the project adds or improves transit facilities
- 3 points if the project maintains transit facilities
- 0 points if the project would not improve or maintain transit facilities

Project sponsor must describe the new or improved transit facilities or provide a description of how the facility will be maintained.

CRITERION 5.4: reduces user group conflicts

 How to score:

- 3 points if the project reduces user group conflicts
- 0 points if the project would not reduce user group conflicts

Project sponsor will provide a description of how user group conflicts are reduced or eliminated. This criterion is focused on reducing conflicts such as those that occur between motorized and non-motorized users or higher-speed users from slower uses. Examples may include separating cyclists from pedestrians, consolidating driveways to limit non-motorized/vehicular interactions, or relocating ATV trails away from roadways.

❖ **Goal Area 6:** Shorten commute times & improve mobility

Shorter travel times between home, work, healthcare, and other services improve quality of life, lower vehicle emissions, and reduce Vehicle Miles Traveled.

CRITERION 6.1: improves level of service (los)

 How to score (scored programmatically with GIS based on the LOS analysis layer):

- 5 points if the project is on LOS E or F roads
- 3 points if the project is on LOS C or D roads
- 0 points if the project is on LOS A or B roads
- 0 points if the project does not have an associated LOS rating (i.e., not applicable)

Project sponsor does not provide any information.

CRITERION 6.2: increases mobility for freight movement

 How to score (scored programmatically by cross-referencing the project location with the State Freight Network data and DOT&PF's traffic volume reports):

- 5 points if the project is on a designated freight network
- 3 points if the project is on a route with a truck volume greater than 10%
- 1 point if the project is on a route with a truck volume of 5-10%
- 0 points if the project does not have an associated truck volume (i.e., not applicable)

Project sponsor does not provide any information.

CRITERION 6.3: addresses a gap in the roadway network

 How to score:

- 5 points if the project connects two roads or extends a road
- 0 points if the project would result in no change

Project sponsor shall describe the project termini and names of the roads being connected or extended; this criterion does not evaluate non-motorized facility connections.

❖ **Goal Area 7:** Build a resilient transportation network.

A resilient transportation network is one that is able to bounce back from natural disasters, extreme weather events, or other significant impacts. A resilient transportation network provides redundant facilities, avoids natural hazards, and is designed to mitigate environmental impacts.

CRITERION 7.1: improves resiliency of at-risk infrastructure

 /  How to score:

- 5 points if the project addresses transportation infrastructure in the 100-year floodplain
- 3 points if the project reduces the vulnerability of transport infrastructure
- 0 points if the project would result in no change

Project sponsor does not provide any information concerning the 100-year floodplain. Project sponsor shall describe how the project reduces vulnerability. Examples may include increasing culvert sizes to accommodate larger floods or moving a road away from a rockfall zone.

CRITERION 7.2: includes features that enhance or protect the natural environment

 How to score:

- 5 points if the project enhances or protects the natural environment
- 0 points if the project provides no specific means of improving the natural environment

Project sponsor will provide documentation on how the natural environment is enhanced or protected. Examples could include installation or repair of fish passage culverts, construction of wildlife under-crossings, or restoration of wetlands.

CRITERION 7.3: provides network redundancy or improves emergency access

 How to score:

- 5 points if the project provides redundant access to a single-access community or emergency facility
- 1 point if the project improves emergency vehicle access or enhances emergency response
- 0 points if the project would not improve emergency access

Project sponsor is responsible for providing documentation on how the project meets this criterion. Documentation from an emergency response entity such as EMS or fire departments are examples.

❖ **Additional Criteria**

These criteria were deemed important to consider when evaluating project nominations, however, they did not fit under any goal area. These criteria are typically included in the MTP project evaluation process by peer MPOs and represent best practices.

CRITERION 8.1: public support

 How to score:

- 5 points for a letter of resolution from an organized governing body (e.g., community council, Road Service Area, city council)
- 3 points for documented public support (e.g., public comments, letters of support, petitions)

The project sponsor is responsible for providing this documentation.

CRITERION 8.2: population reached

 How to score:

- 5 points if the project reaches a regional/areawide population
- 3 points if the project reaches a single community
- 1 point if the project reaches multiple neighborhoods/destinations
- 0 points for projects that only reach a single neighborhood/destinations

MVP staff will evaluate this criterion using GIS to analyze the project's reach. The extent of the project's reach will be determined from the MSB's parcel data layer.

CRITERION 8.3: roadway functional classification

 How to score:

- 5 points if the project is on arterials or greater
- 3 points if the project is on a major collector
- 1 point if the project is on a minor collector
- 0 points if the project is on a local road

MVP staff will evaluate this criterion using the roadway functional classifications GIS layer from AK DOT&PF.

Scoring Matrix Summary

Goal	Weight (%)	Total points available	Total potential score	Data Source / Method
Transportation alignment with land use	15	11	165	Plans referenced by the project sponsor
Improve safety for all modes	25	12	300	Crash analysis/EPDO GIS
Leverage funding sources	5	3	15	Project sponsor provided; budgets
Maintain a system in good repair	20	13	260	Baseline condition assessments (e.g., IRI, PCI); public comments
Create transportation options	10	18	180	Project sponsor provided descriptions
Shorten commute times & improve mobility	10	15	150	GIS of LOS and freight routes; project sponsor provided info
Build a resilient transportation network	15	15	225	Project sponsor provided info
Public support	--	5	5	Documentation
Population reached	--	5	5	GIS analysis of adjacent parcel data
Functional class	--	5	5	DOT&PF maps
Totals		102	1,460	

Data and Tools

Evaluation relies on both analytical tools and qualitative input.

Documentation and Transparency

All project scores, assumptions, and data sources will be documented. Summary score sheets are made available for review by MPO committees and the public.

Periodic Review and Updates

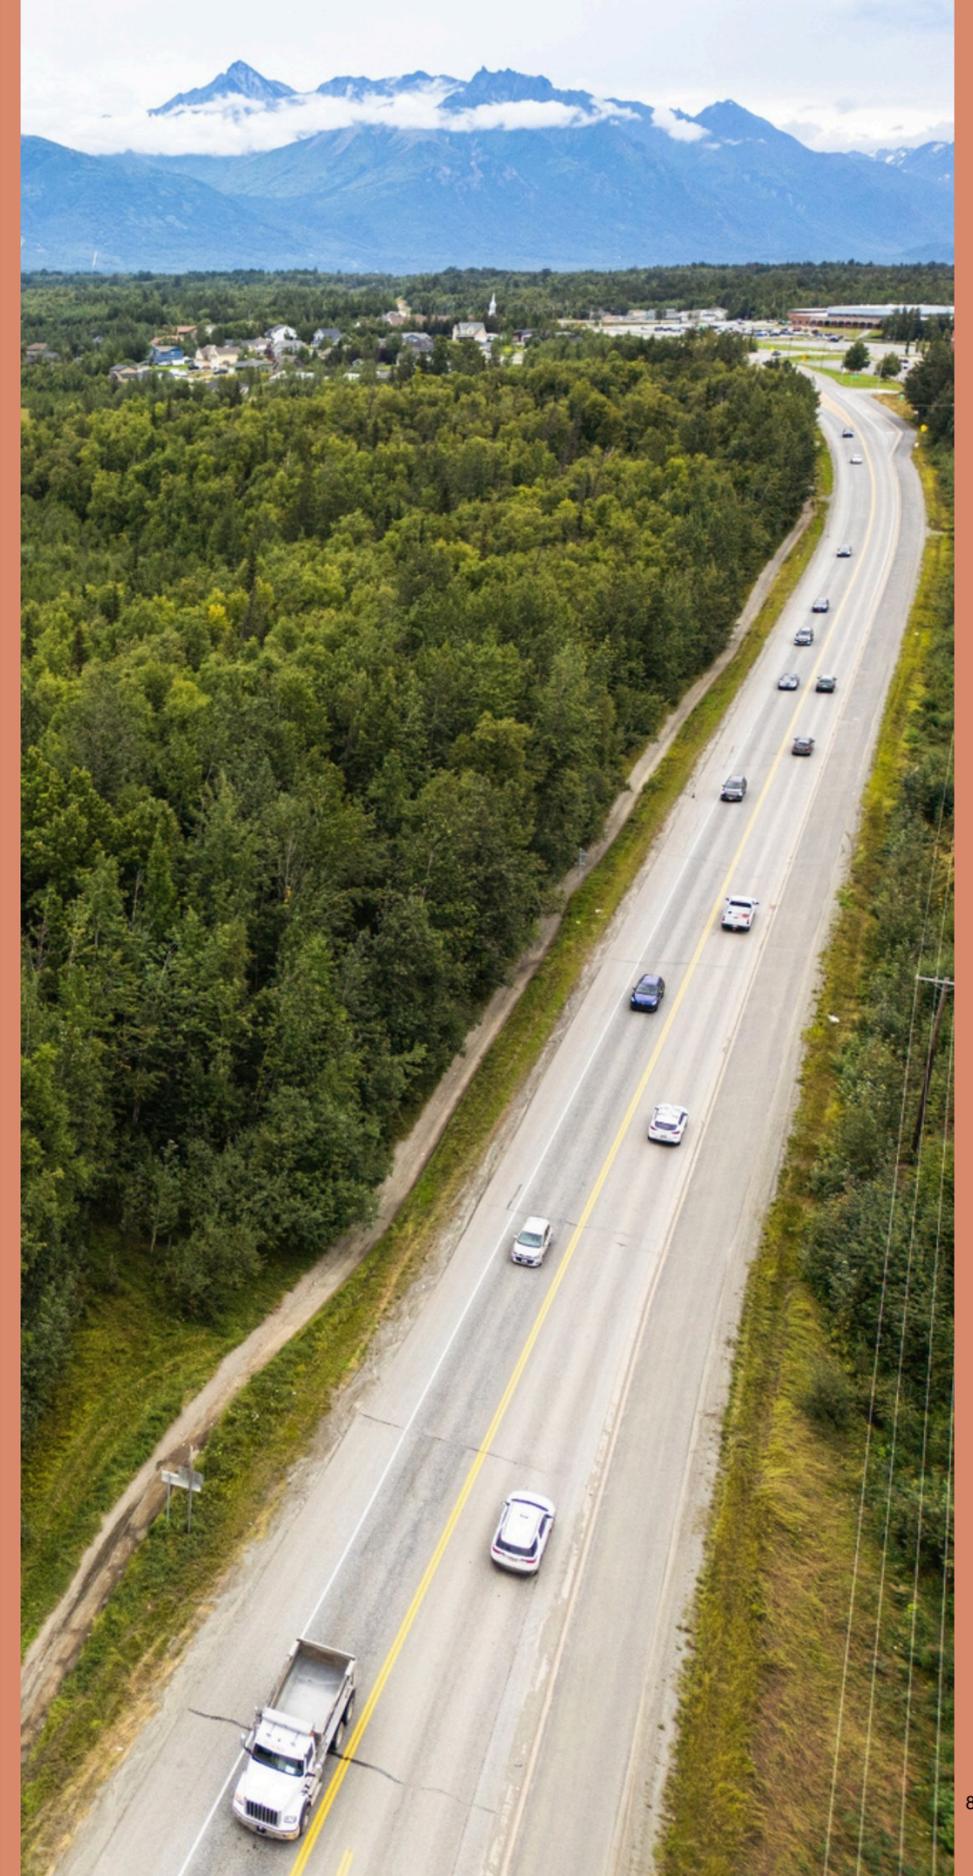

The MPO will periodically review and refine its evaluation criteria and weighting structure to reflect updated regional goals, new data sources, and federal guidance.

MATSU VALLEY
PLANNING *for*
TRANSPORTATION

Metropolitan Transportation Plan

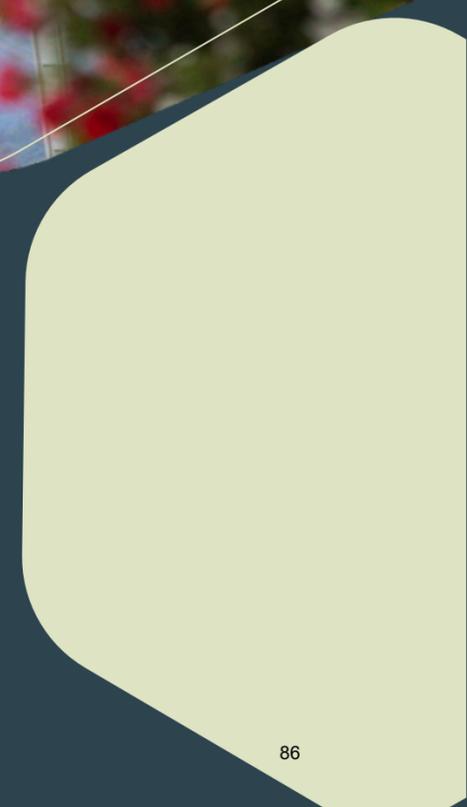

Technical Committee
February 10, 2026

Agenda

01. Overview of Public Survey Results

02. Overview of Public Comment Map Results

01.

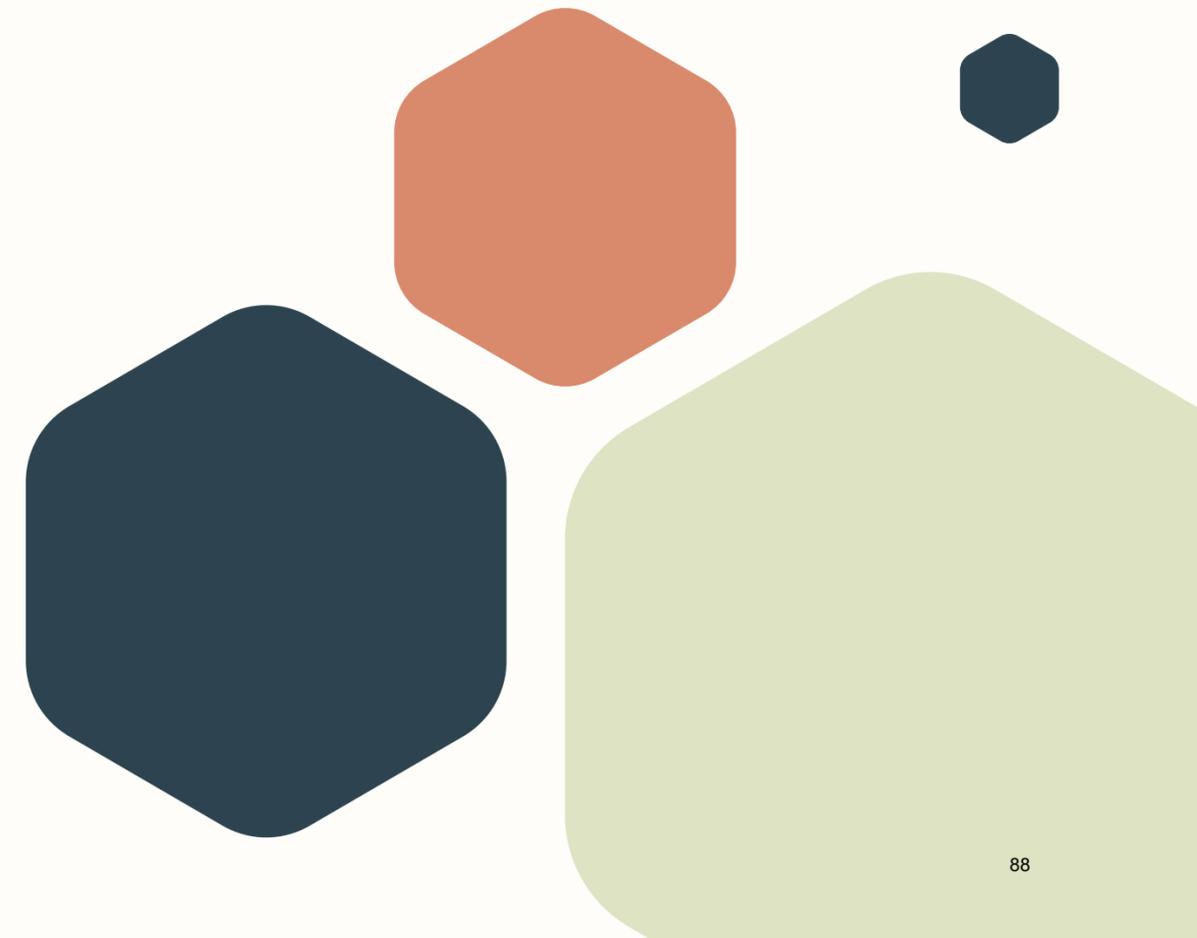

Public Survey

We asked, and residents responded

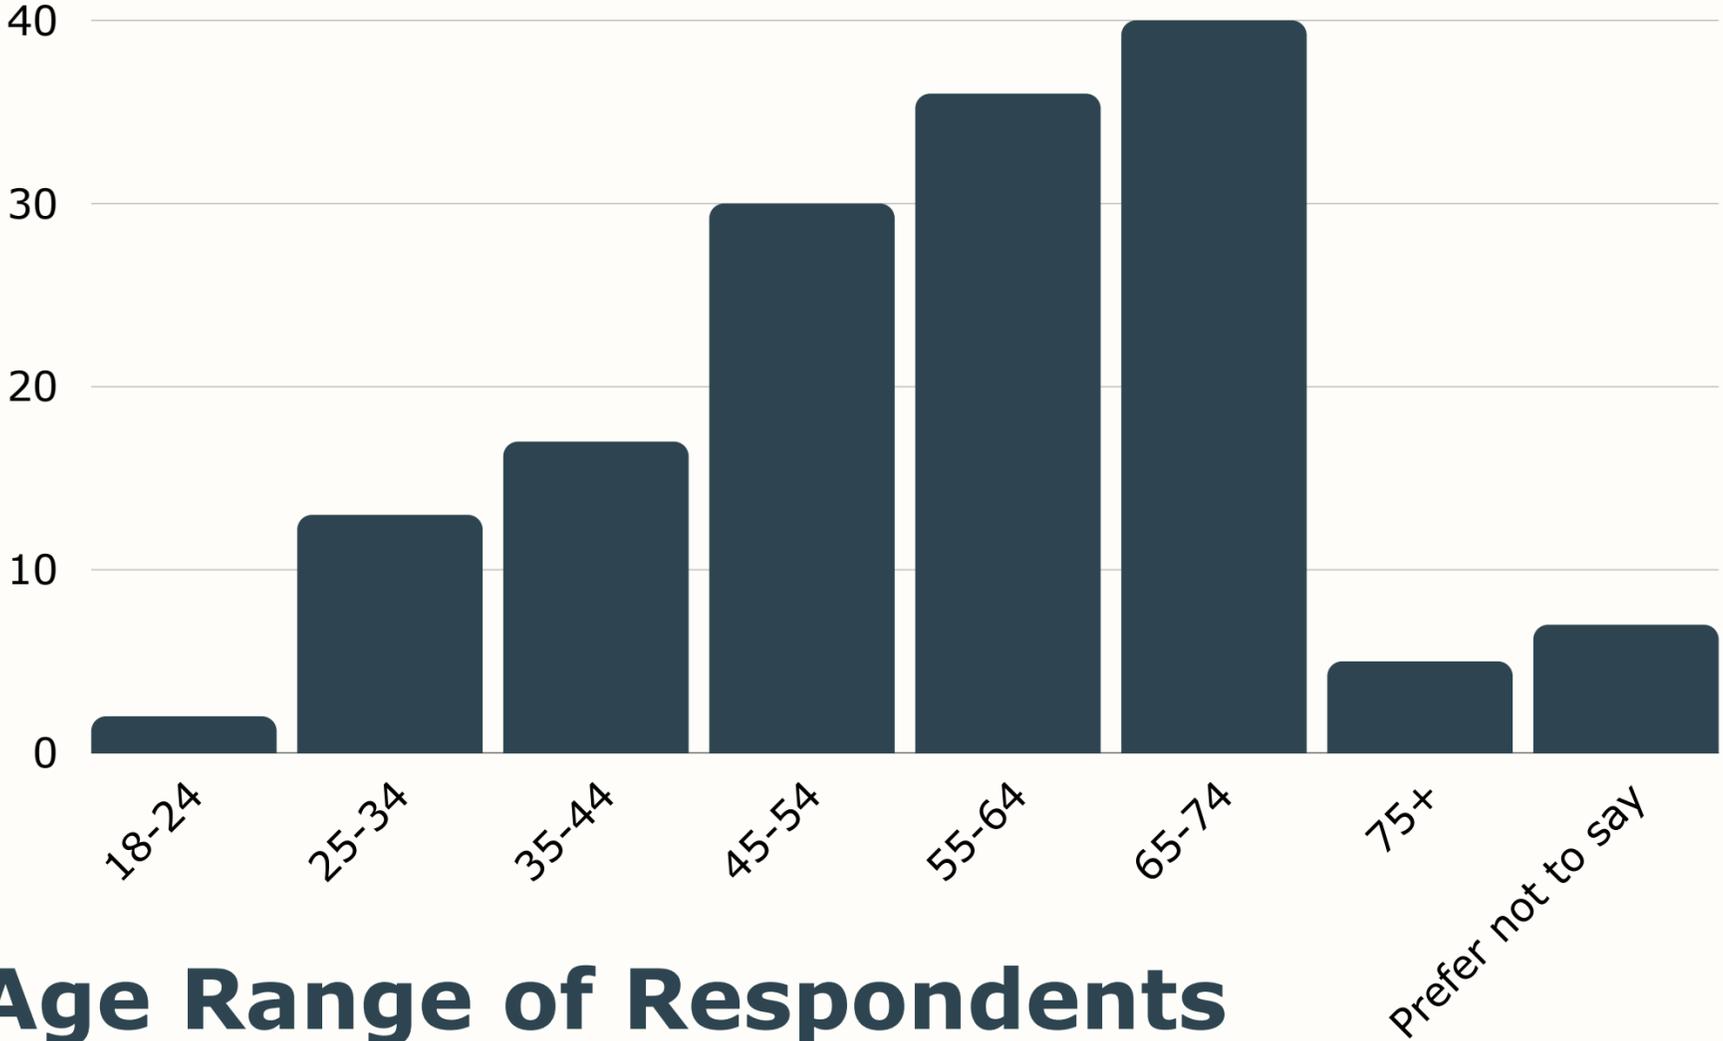

Survey Details

- Open December 1, 2025 - January 31, 2026
- 19 questions that focused on:
 - Demographics
 - Transportation mode preference
 - Perceived safety
 - Transportation concerns and opportunities
 - Maintenance and conditions
 - Freight
 - Travel patterns
- 150 responses

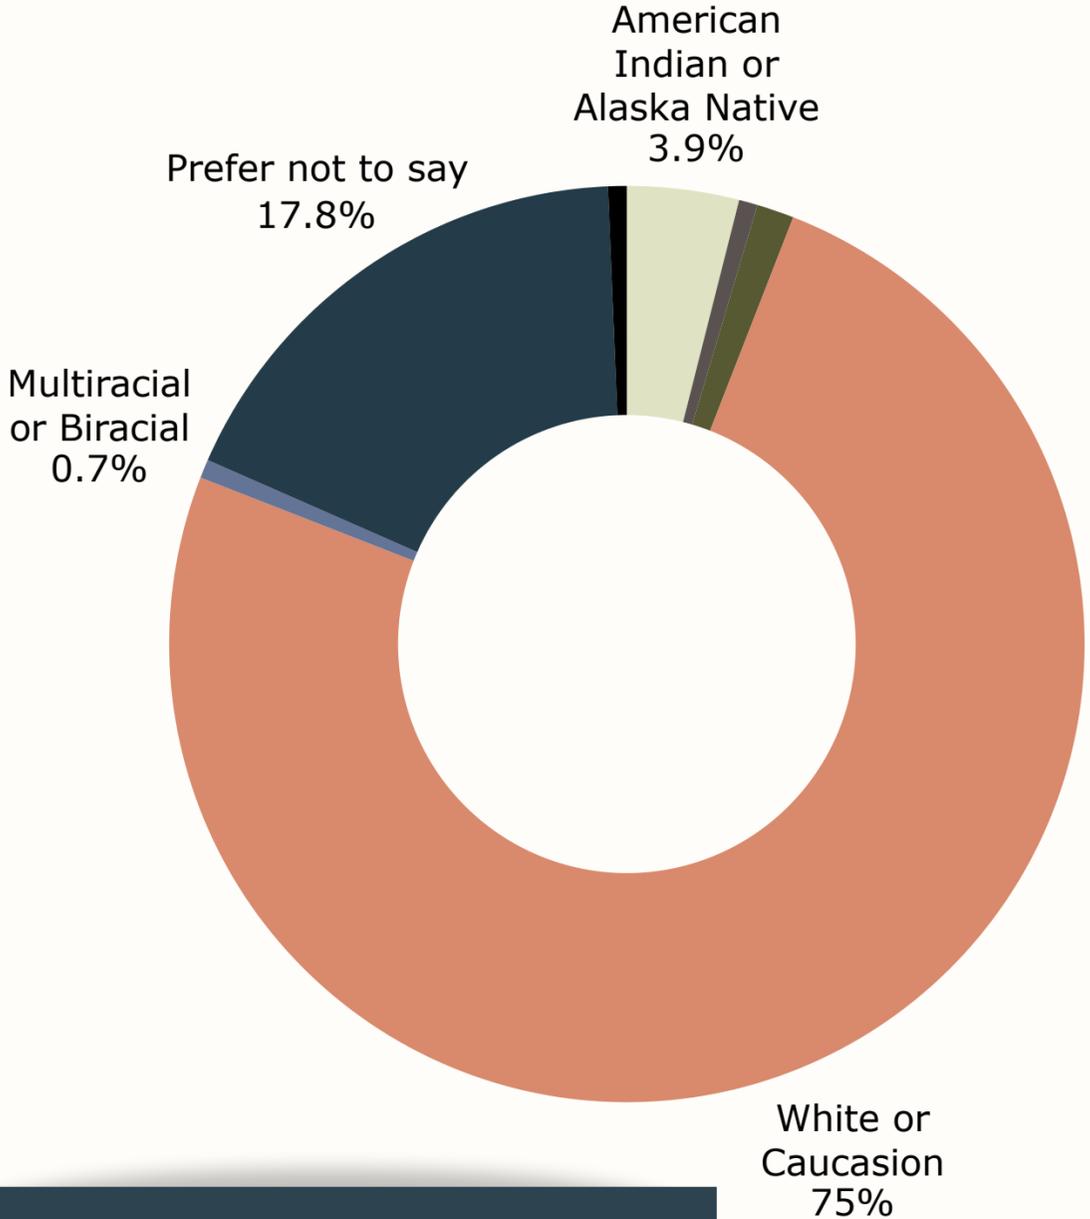

Survey Demographics

Age Range of Respondents

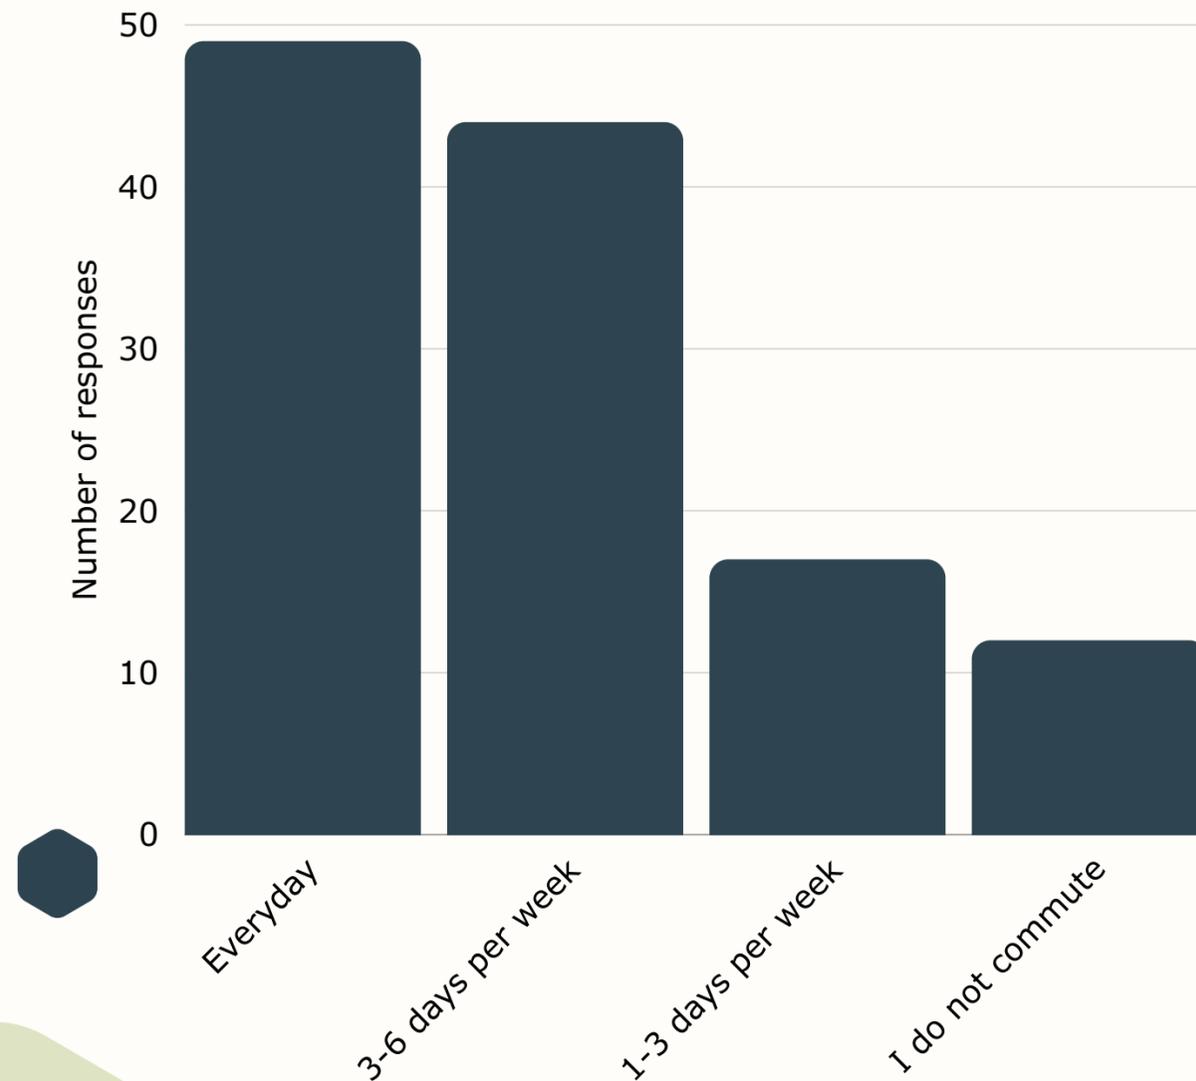

17% of respondents have someone in their household with mobility challenges

Race/Ethnicity of Respondents

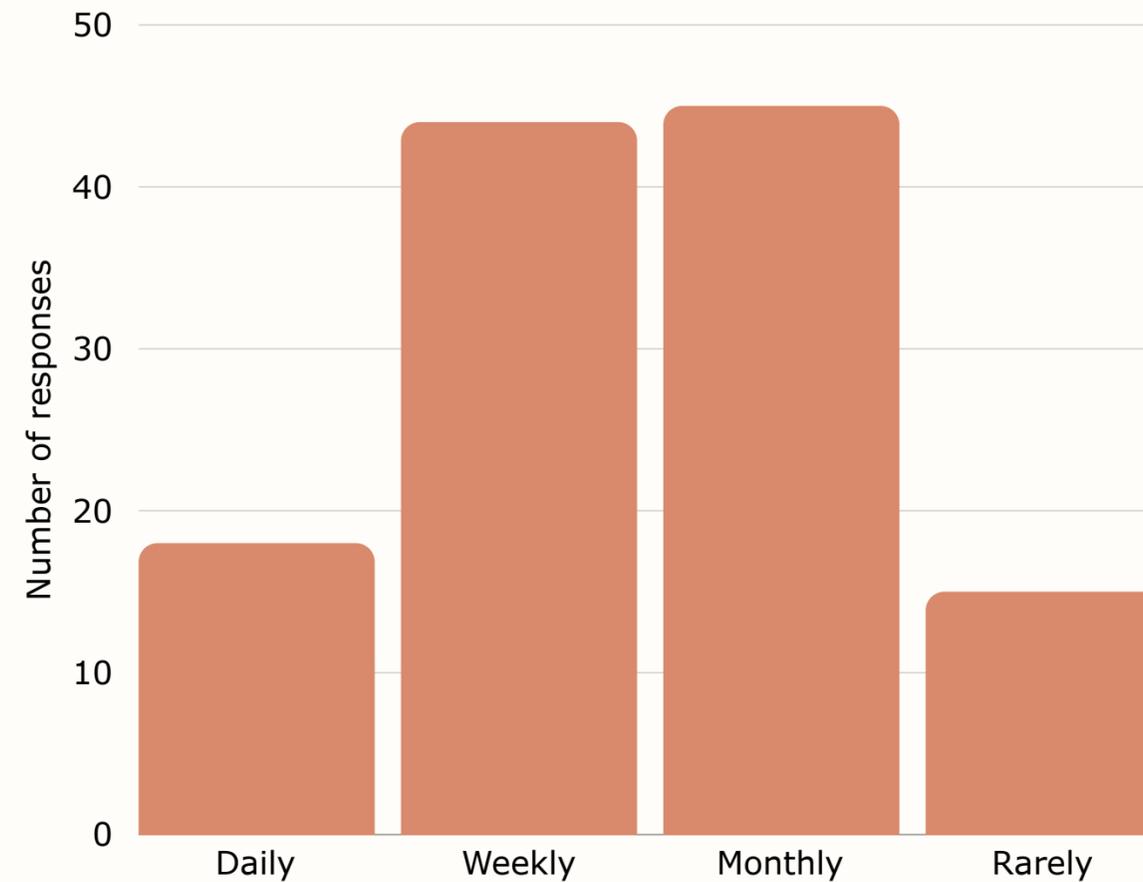

Not labeled in pie chart:
 Hispanic or Latino 1.3%
 Black or African American .7%
 A race or ethnicity not mentioned .7%

Travel Inside the MSB

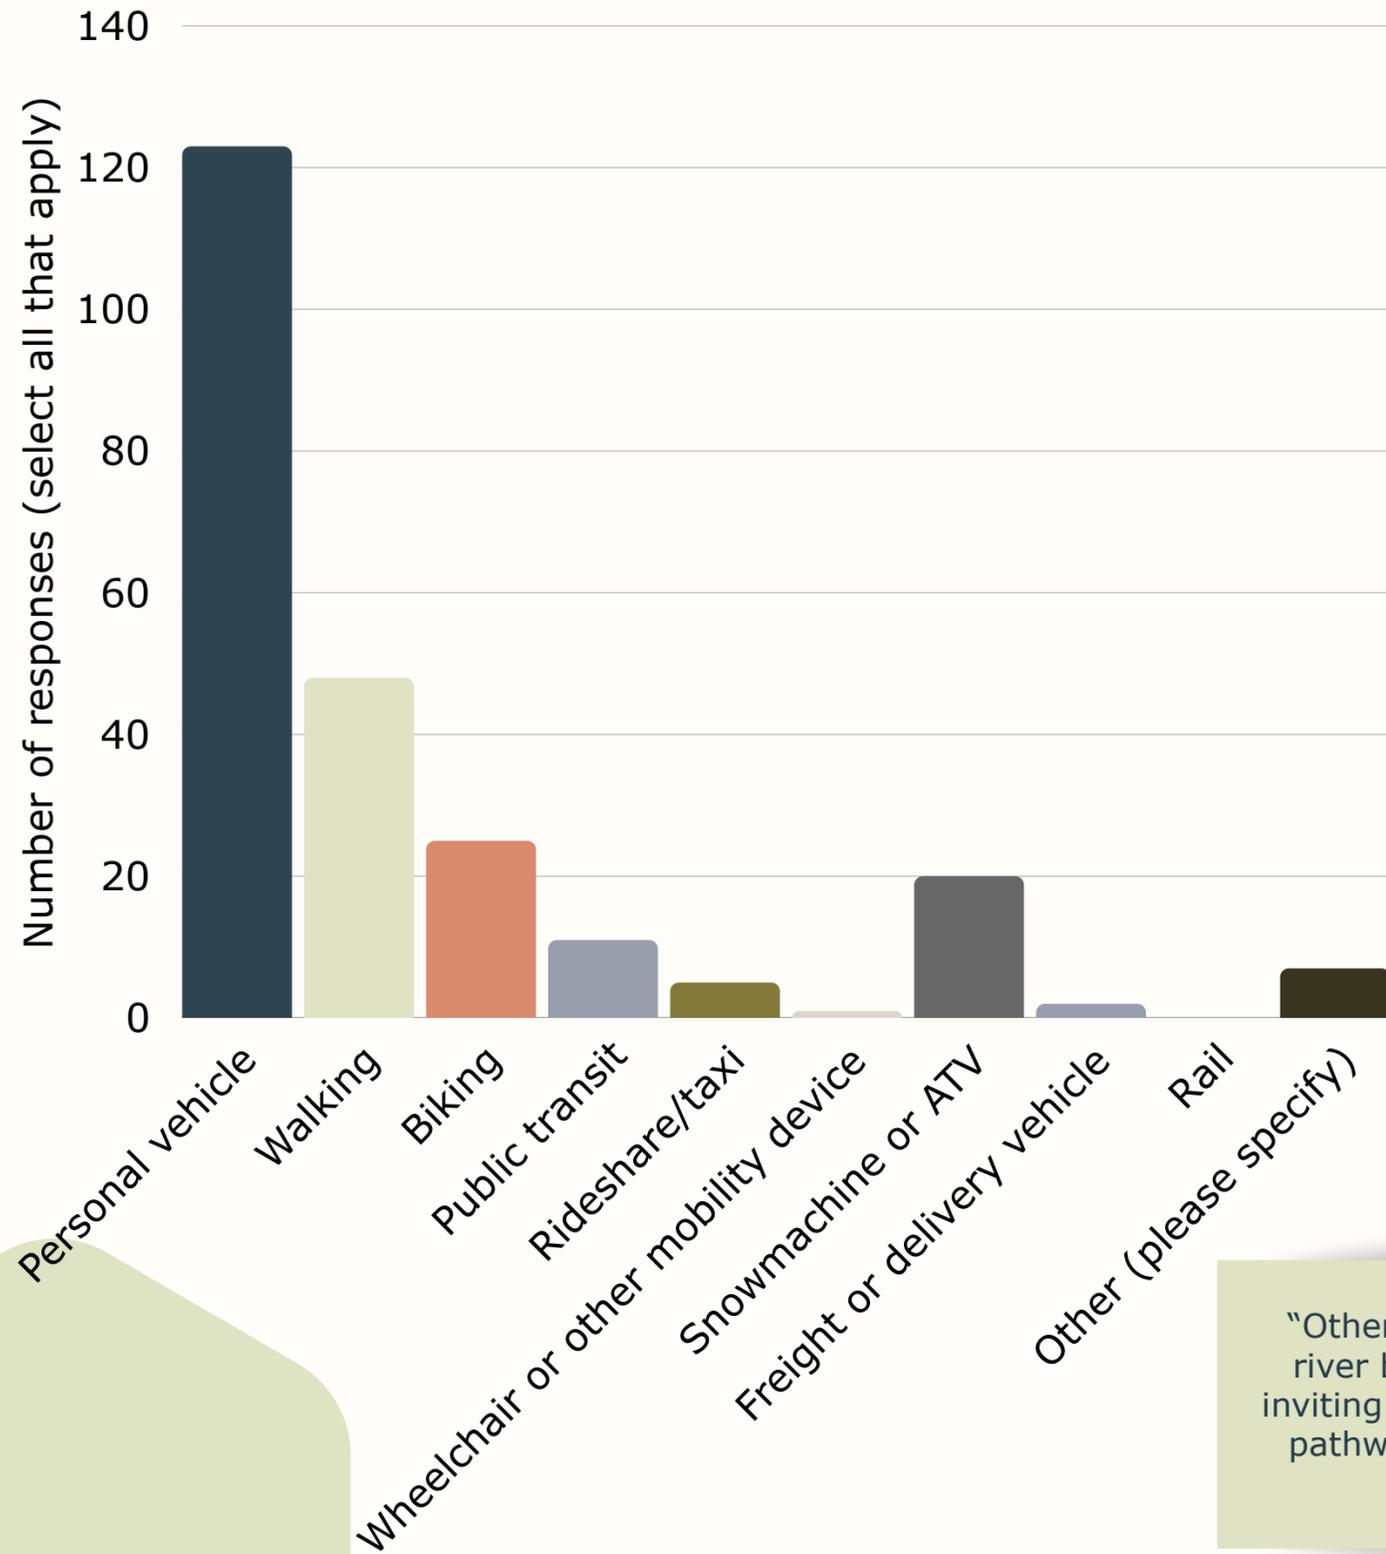

Travel Outside the MSB

78% of respondents travel in the morning and roughly half traveling Afternoon/Evening. **MTP projects should aim to prioritize movement and access management on corridors with known peak conflicts** (e.g., Parks Hwy through Wasilla, Palmer–Wasilla Hwy).

Chosen Modes

"Other" includes horse, private aircraft, river boat, one wheel, and motorcycle, inviting the MTP to consider how proposed pathways or road widening could affect different user groups.

Perceived Safety by Mode

Active transportation safety gaps are structural, not preference-based, meaning **people aren't walking or biking because of mode preference, rather they avoid it because of conditions and design** (e.g. lack of winter maintenance or disconnected pathways)

Top Transportation Concerns

Getting around isn't always planned with growth in mind

Lack of walking and biking facilities

Lack of safety

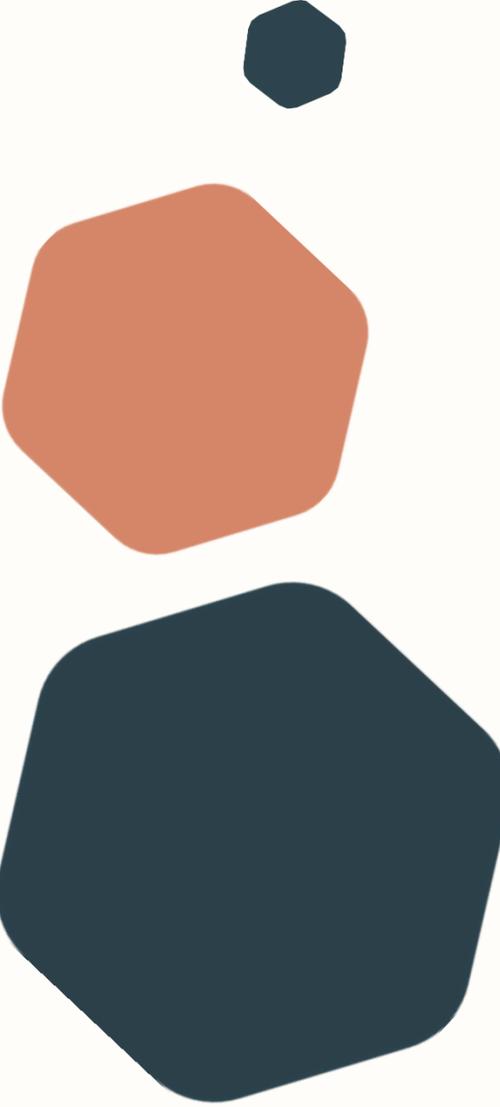

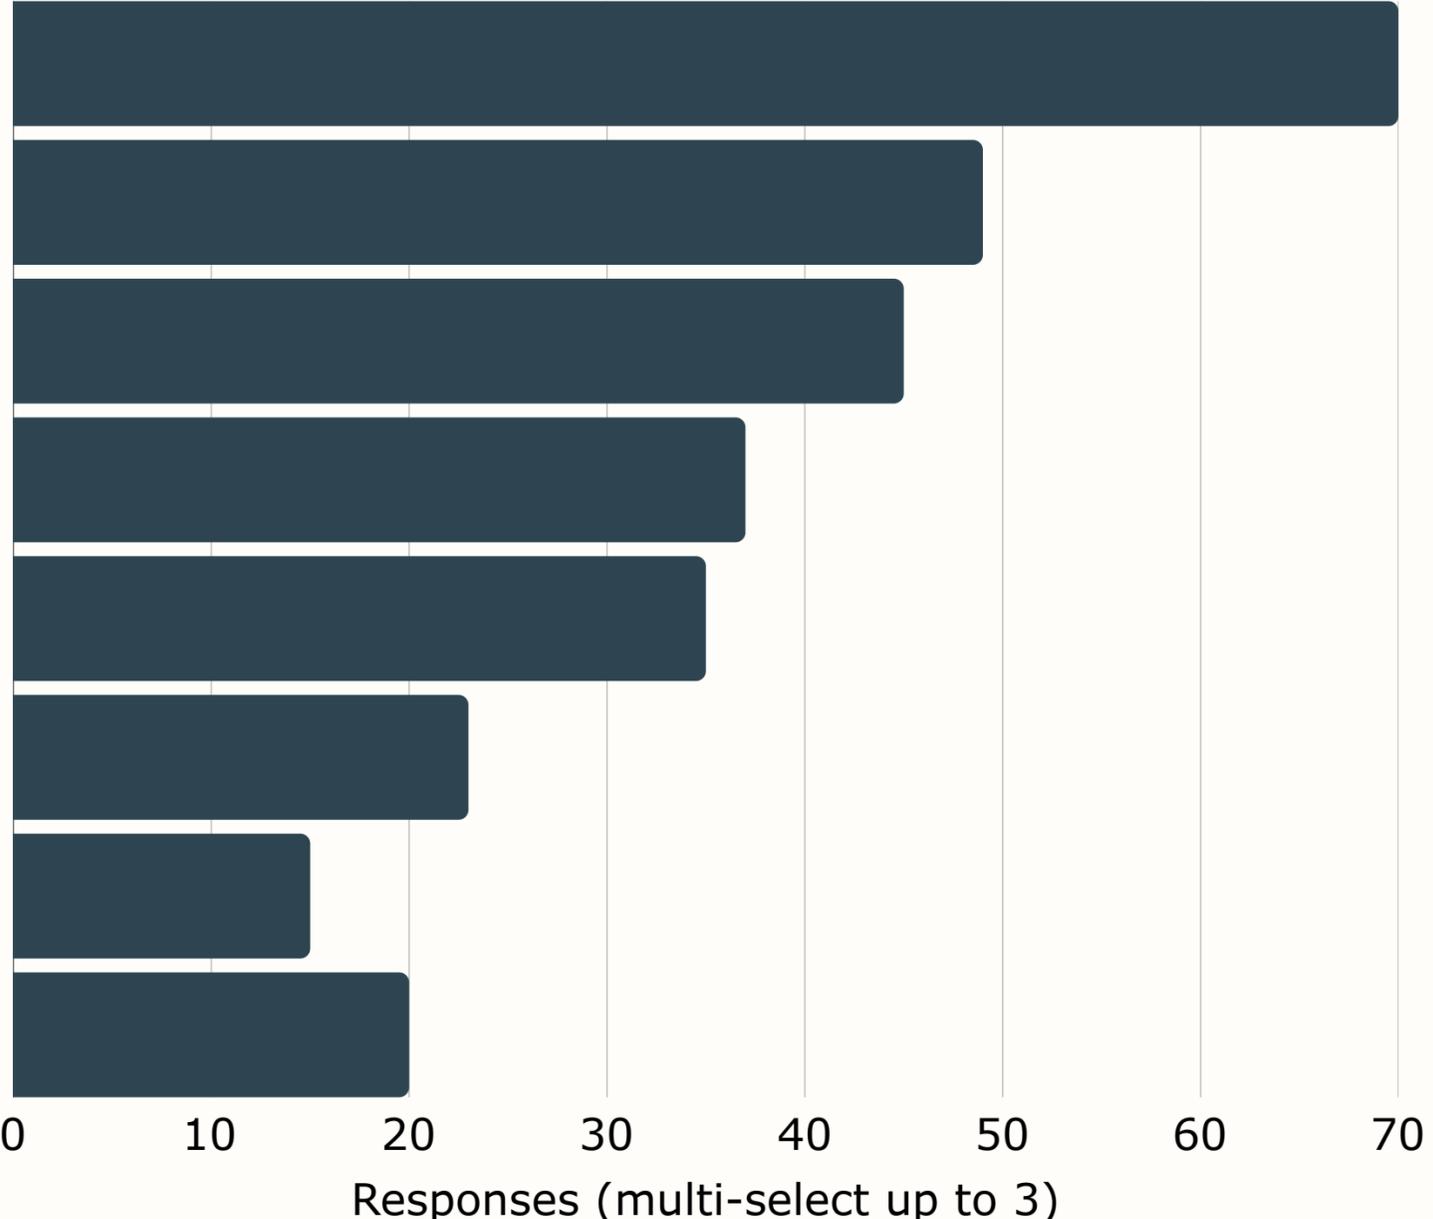

Long commute times

Lack of transit

Insufficient funding availability

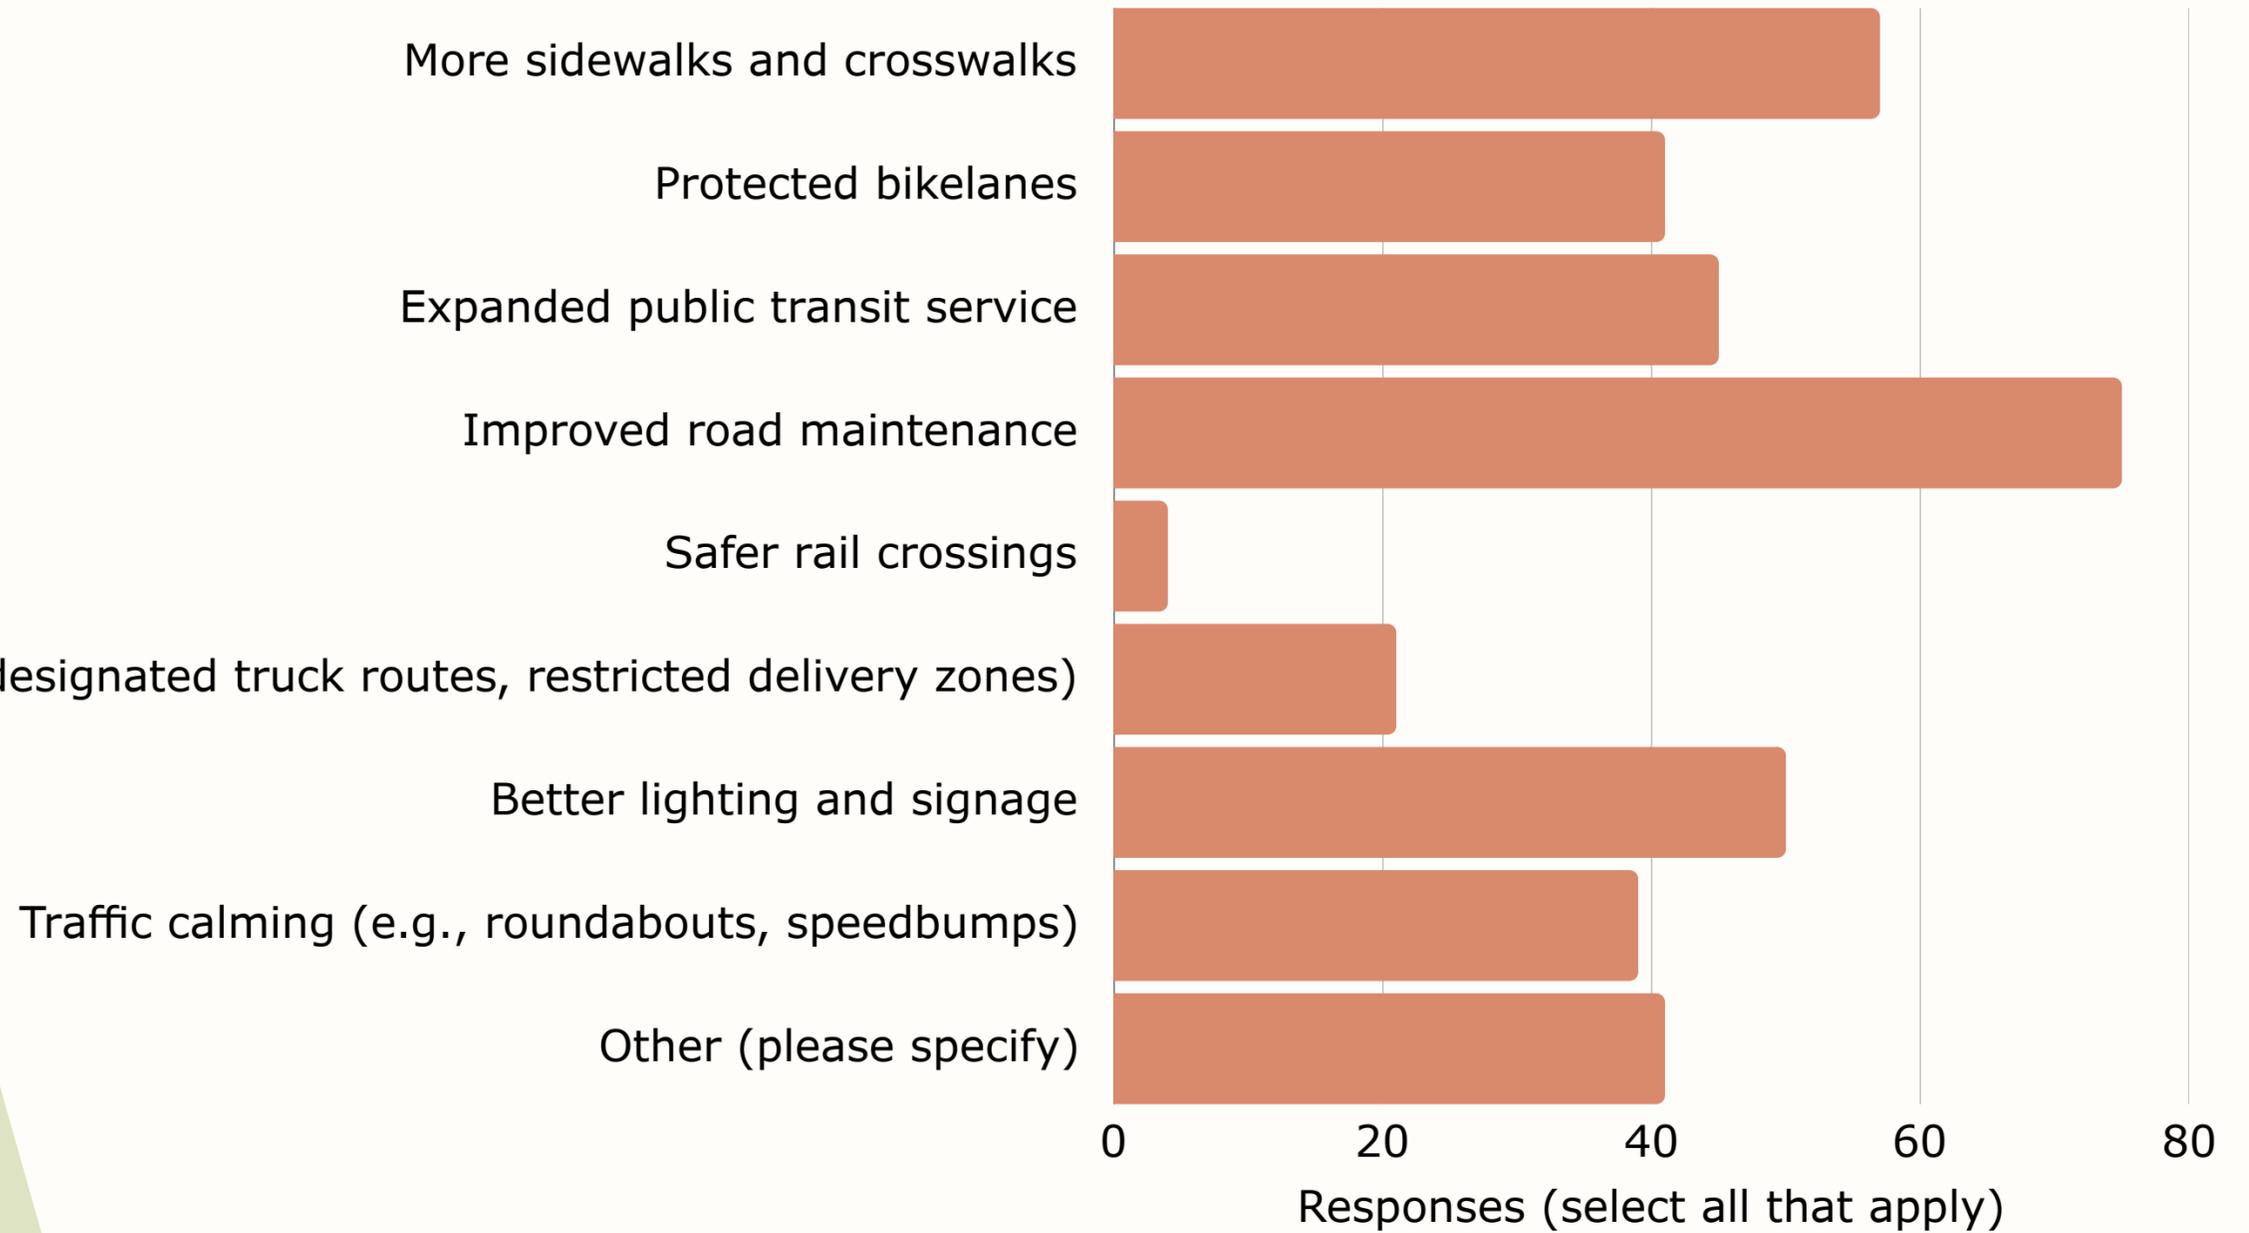

Conflicts between user groups

Other

Top Opportunities to Improve Safety

Freight route separation (e.g., designated truck routes, restricted delivery zones)

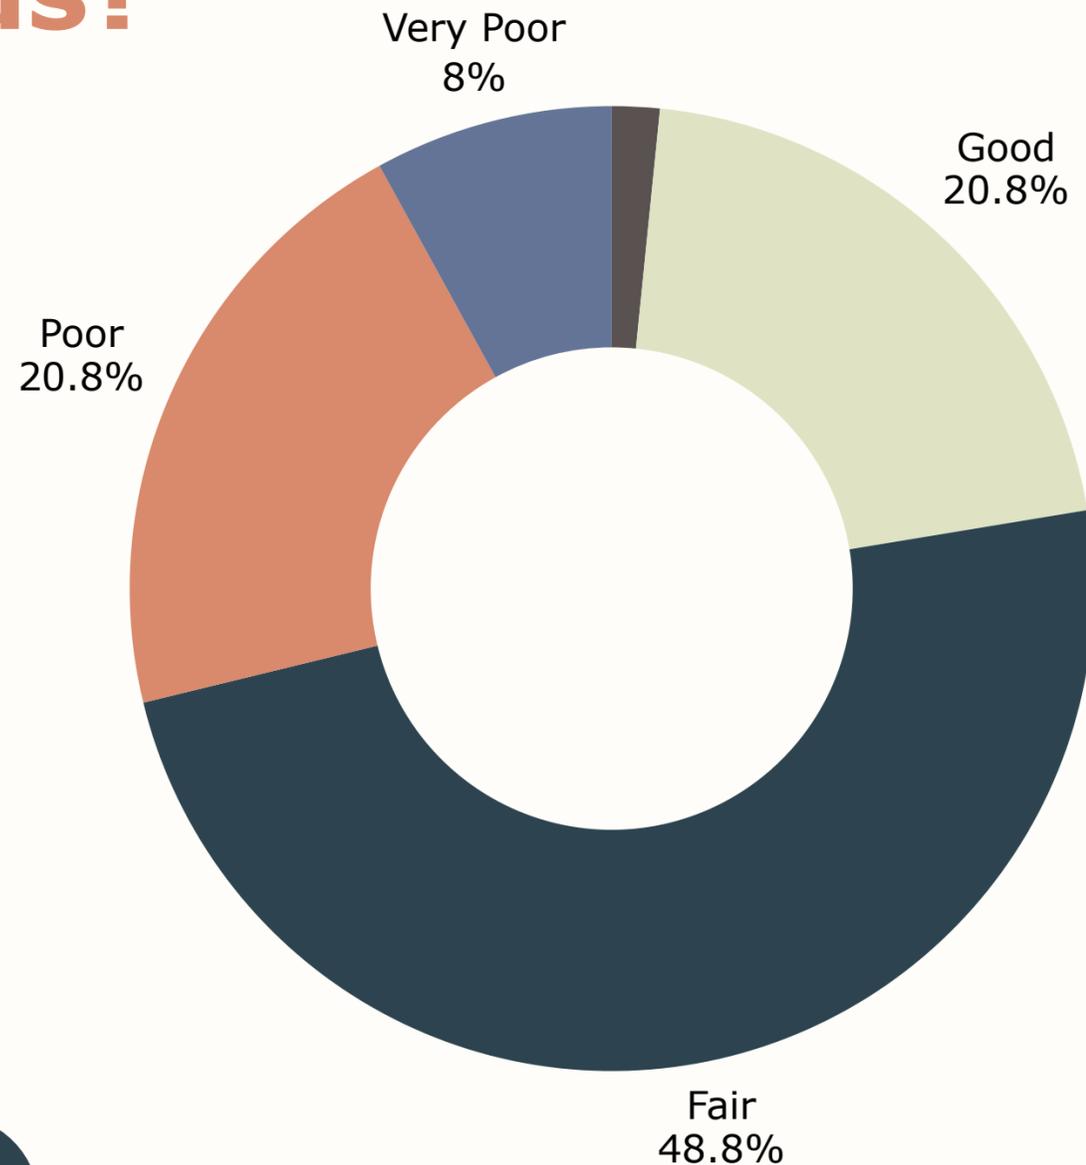

Across questions, **respondents are repeatedly linking safety to maintenance.**

Nominating projects that prioritize maintenance and safety outcomes would likely be well received (e.g. pavement rehab with crosswalk).

Maintenance and Road Conditions

How would you rate the roads?

Seasonal Challenges?

Category	% of Responses
Maintenance	48%
Weather	38%
Bike/Ped	24%
Safety	20%
Poor drivers	8%
Natural hazards	2%
Transit	2%
Cost	2%

Priorities for future investments

- 1 CONGESTION
- 2 SAFETY
- 3 CONSISTENT MAINTENANCE
- 4 ENVIRONMENTAL RESILIENCY
- 5 CONNECTIVITY
- 6 ECONOMIC DEVELOPMENT

Project and Policy Takeaways

- **Wasilla area:** Strongest sentiment towards congestion, intersection safety, and left-turn protections. Consider projects that relieve corridor choke points or add redundancy.
- **Palmer area:** Highest priority of safety and strongest interest in active transportation connections. Consider projects aimed at safety for bicyclists and pedestrians.
- **MSB area:** Highest urgency for congestion and an emphasis on economic development. Consider land use and transportation policy coordination and increasing connection and capacity on alternate routes.

Re: **Allocation of FTA Section 5307 Apportionment**

Dear Commissioner Anderson:

Following a review of the Federal Transit Administration's (FTA) Section 5307 Urbanized Area Formula Program requirements, the Matanuska-Susitna Borough (referred to as the MSB) respectfully provides this policy analysis in support of allocating the full 5307 apportionment to the Borough as the sole recipient within the Mat-Su Urbanized Area (UZA).

Section 5307 funding is designed to assist with planning, managing, and operating public transportation within urbanized areas. To meet this purpose, apportionments must be directed to the entity that both provides eligible public transit services and fulfills the associated federal compliance responsibilities.

Within the Mat-Su UZA, the MSB believes it is the only organization that provides qualifying public transportation and fulfills the required federal duties, including planning, reporting, and ongoing compliance. These responsibilities are essential components of administering federally supported urban transit programs and are not performed by any other regional entity.

FTA defines public transportation as "a conveyance that provides regular and continuing general or special transportation to the public," excluding school bus, charter, sightseeing, intercity bus, and intercity passenger rail. The Alaska Railroad's passenger rail operations through Wasilla, while a valued and important service, operate as part of longer intercity routes between Anchorage, Talkeetna, and Fairbanks, and generally follow seasonal or limited schedules. These trips primarily serve long-distance travel, tourism/sightseeing, rather than providing daily urban mobility within the UZA.

For these reasons, the Alaska Railroad's existing operations do not meet the definition of regular public transit service under Section 5307, nor do they involve the transit planning or federal program administration requirements. While the program does allow for certain rail-related capital investments, those categories do not align with the Borough's current primary transit services.

Providing Outstanding Borough Services to the Matanuska-Susitna Community

We also wish to recognize the ongoing public interest in future commuter rail options, including concepts for a seasonal or limited-weekday winter pilot between the Mat-Su Valley and Anchorage. While this idea continues to generate regional discussion, no such service has been implemented to date, and therefore, it does not support eligibility under the current Section 5307 program structure.

Directing 100 percent of the 5307 funds to the MSB ensures that these federal resources support the entity responsible for providing essential local transit services and upholding all program obligations. This approach promotes the efficient use of federal dollars and supports consistent service for residents within the Mat-Su UZA.

We appreciate the Department's collaboration and remain available to discuss any portion of this analysis or provide additional information at your convenience.

Sincerely,

Michael Brown
Borough Manager

Re: Allocation of FTA Section 5307 Apportionment

Commissioner Anderson:

The Alaska Railroad (ARRC) was copied on a letter sent to you by Mat-Su Borough (MSB) Manager Mike Brown on February 9, 2026, concerning Federal Transit Administration (FTA) Section 5307 Urbanized Area Formula funds. The letter states a number of legal and factual errors related to ARRC's eligibility for 5307 funds, which we find important to correct for the record.

First, the letter states in error, "(T)he Alaska Railroad's existing operations do not meet the definition of regular public transit service under Section 5307." However, the letter misquotes the federal law in the preceding paragraph and then incorrectly implies ARRC passenger is ineligible as "intercity." The relevant federal statute quoted in the letter is 49 USC 5302(15), which reads as follows (bolding added):

49 USC 5202(15) Public transportation .— The term "public transportation"— (A) means regular, continuing shared-ride surface transportation services that are open to the general public or open to a segment of the general public defined by age, disability, or low income; and (B) does not include— **(i) intercity passenger rail transportation provided by the entity described in chapter 243 (or a successor to such entity);** (ii) intercity bus service; (iii) charter bus service; (iv) school bus service; (v) sightseeing service; (vi) courtesy shuttle service for patrons of one or more specific establishments; or (vii) intra-terminal or intra-facility shuttle services.

The "does not include" reference is to **Amtrak, i.e., "the entity described in chapter 243"** of the federal statutes Title 49. That is NOT an exclusion of ARRC's passenger service. Rather, ARRC for many years has been legally determined by FTA to be eligible for FTA funds.

It follows that the letter is also incorrect in stating that MSB is the "only" organization that provides qualifying public transportation and fulfills requires federal duties "not performed by any other regional entity." As noted above, ARRC does provide eligible public transportation. The second part of the sentence is also incorrect, because ARRC as a regional public transportation entity has been performing all responsibilities of administering FTA funds for many years.

In other words, using the words in the Feb. 9 letter's second paragraph, "(A)pportionments must be directed to the entity that both provides eligible public transit services and fulfills the associated federal compliance responsibilities," ARRC has both eligible public transit services and fulfills federal compliance responsibilities for FTA funds. It will be assumed for the sake of argument that MSB can also meet both tests, but that is a matter of determination for the FTA and your department.

Beyond the above clarifications, it is a different issue how the 5307 funds be apportioned within the Mat-Su UZA. That is a policy choice. ARRC has previously suggested a funding split that we believe is fair to all parties, could be applied equitably to both the Mat-Su and Fairbanks UZAs, while recognizing ARRC's continued eligibility and justification for 5307 funding. That December 10, 2025 letter is attached.

Sincerely,

Brian Lindamood, PE, SE

MEMORANDUM

To: Commissioner Ryan Anderson

Cc: Bill O' Leary, Michelle Maddox, Christina Isabelle

From: Brian Lindamood
Chief Engineer 

Subject: Proposed Formulaic Calculation of the Split for Direct Recipients of FTA 5307 funds for small MPO's

The Alaska Railroad Corporation (ARRC) is a direct recipient of Federal Transit Administration (FTA) 5307 funds for regularly scheduled year-round public passenger service. ARRC is dependent upon these funds to continue to make necessary capital investments in our fixed and mobile infrastructure to ensure the safety and viability of service. The amount of annual 5307 funds available is calculated by FTA in two ways depending upon the size of the Metropolitan Planning Organization (MPO).

For large MPO's (population over 200,000), the apportionments are calculated by FTA substantially upon Direct Route Mileage (DRM) maintained by the National Transit Database (NTD). The "split" between the Direct Recipients, is established by a letter signed by the Direct Recipients within the MPO, directing the FTA what portion of 5307 funds is to be allocated to each Direct Recipient ("Split Letter"). Typically, the mileage used for these calculations is within the MPO's boundary.

However, ARRC receives additional formula funds for providing year-round, regularly scheduled, fixed-guideway passenger service between Seward, Whittier, Anchorage, and Fairbanks. This additional mileage, calculated at 27% of DRM outside any MPO boundary, is added to ARRC's contribution to the Anchorage MPO (AMATS)¹. ARRC has long insisted, and it has been standard practice, for the Split Letter for 5307 funds in AMATS to be based upon the dollars "earned" by the respective Direct Recipients because the amount of 5307 funds that ARRC receives through AMATS is substantially generated through passenger rail operations outside the AMATS boundary.

¹ 49 United States Code 5336(b)(2)(E)

For small MPO's (under 200,000 people), FTA uses a population-based formula, allocated at the state level, from which it is impossible to calculate a "split" between different transit provider's contributions to the 5307 funds distributed to a specific MPO. FTA uses an Apportionment Letter from ADOT&PF Commissioner's Office to distribute all state small MPO 5307 funds between the small MPOs, and further incorporates a Split Letter generated by ADOT&PF distributing funding between Direct Recipients in those small MPOs. The difference is that the Split Letter for small MPOs comes directly from the Commissioner's Office, not a joint letter from the Direct Recipients from within a large MPO.

Until 2024, the only small MPO within which ARRC operated passenger service was Fairbanks (FAST). The route mileage attributable to ARRC within the FAST boundary pales in comparison to the Fairbanks transit provider, and for this reason, ARRC has not attempted to recoup any of these funds in the past, outside of special circumstances. The creation of the Mat-Su Valley MPO (MVP) has resulted in a larger portion of ARRC route miles being shifted from AMATS to MVP, and a subsequent amount of 5307 funding that ARRC received through AMATS will now have to come through the smaller MPOs.

Due to this shift in funding distribution, ARRC has been actively working to address this issue to both recover critical capital funds needed for the railroad's state of good repair, and that the solution needs to be applied evenly to both small MPO's (and future ones as they develop). Further, it is critical for this process to be standardized and predictable such that each entity can reasonably plan for future funding without time-consuming negotiations on an annual basis.

ARRC is respectfully requesting that, for 2024, 2025, and all future years, the "Split Letter" submitted by ADOT&PF to FTA for the distribution of 5307 funds to Direct Recipients in small MPOs be based upon the formulaic approach outlined below. The result would be that ARRC would be "made whole" for the 5307 funds we have historically received through AMATS that are no longer in the AMATS 5307 split calculation.

Route Miles, from NTD, used by FTA, by MPO:

MPO	NTD DRM
AMATS, within boundary	40.2
AMATS, outside boundary	891.4
MVP	20.4
FAST	8.0

For 2024, the calculations would be as follows:

The value of the route mile in the small MPOs is based upon the value of the route mile in AMATS. From FTA Region 10, the ARRC split of 5307 in AMATS is \$14,995,962.00². The calculation of 5307 funding per route-mile is:

$$\$14,995,962.00 \div (40.2 \text{ miles} + 27\% \times 891.4 \text{ miles}) = \$53,389.59$$

The apportionment for each small MPO then becomes 27% of the DRM within each small MPO boundary, multiplied by the AMATS 5307 apportionment per DRM. This represents what ARRC would receive through AMATS if the DRM in the small MPOs had remained outside of any MPO boundary.

MPO	Route Miles	27% of NTD DRM	2024 ARRC 5307 Share
MVP	20.4	5.5	\$293,642.75
FAST	8.0	2.2	\$117,457.10

For 2025 (NTD DRM remain unchanged):

From FTA Region 10, the ARRC split of 5307 in AMATS is \$15,342,576.00³. The calculation of 5307 funding per route-mile is:

$$\$15,342,576.00 \div (40.2 \text{ miles} + 27\% \times 891.4 \text{ miles}) = \$54,584.76$$

MPO	Route Miles	27% of NTD DRM	2025 ARRC 5307 Share
MVP	20.4	5.5	\$300,216.20
FAST	8.0	2.2	\$120,086.48

² FTA Apportionment Table 3 with supplementary split table from FTA Region 10 used for AMATS 2024 Split Letter.

³ FTA Apportionment Table 3 with supplementary split table from FTA Region 10 used for AMATS 2025 Split Letter.

Matanuska-Susitna Valley Metropolitan Planning Organization (MVP)
Federal Highway Administration

Subject: Revised FFY26 HSIP Plan

State, Federal, and Community Partners,

The Alaska Department of Transportation & Public Facilities (DOT&PF) has approved a revised Federal Fiscal Year (FFY) 2026 Highway Safety Improvement Program (HSIP) Funding Plan. This update builds on the previously approved plan and reflects additional coordination and refinements intended to accelerate delivery of high-priority safety improvements.

Following further coordination with the Municipality of Anchorage, DOT&PF refined the FFY 2026 plan to advance Anchorage safety projects by prioritizing project readiness and delivery capacity. This approach uses federal Advance Construct tools to accelerate funding availability and aligns delivery resources - including DOT&PF and Municipal staff, contractors, and utility partners - to support timely project delivery.

HSIP is one of several tools DOT&PF uses to reduce fatal and serious-injury crashes through data-driven, federally eligible safety investments. The revised FFY 2026 plan prioritizes projects based on documented crash history, benefit-cost performance, and readiness to deliver, while ensuring investments are positioned not only for obligation, but for successful delivery on the ground.

DOT&PF remains committed to continued collaboration with metropolitan planning organizations, local governments, tribal partners, and the Federal Highway Administration as projects advance. We appreciate the ongoing engagement that informs HSIP programming and look forward to delivering meaningful safety improvements for all Alaskans.

Sincerely,

A handwritten signature in black ink, appearing to read "Ryan Anderson".

Ryan Anderson, P.E.
Commissioner

PHONE NO: (907) 451-2283

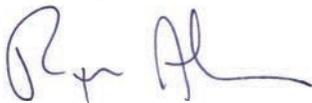

FROM: Pam Golden, P.E. ^{Initial} PKJ
State Traffic and Safety Engineer

SUBJECT: FFY26 HSIP
Funding Plan Update

We request approval of the FFY 2026 Highway Safety Improvement Program Funding Plan Update (STIP Need ID 19217). The plan represents estimated project obligations by funding source, by project phase, and by region. Available funding was assumed to be the anticipated apportionment as shown in Notice N4510.905 for HSIP and Railway-Highway Crossings Program (RHCP) Formula Program; Vulnerable Road User (VRU) Special Rule set aside; and 154 and 164 Penalty Funds. All are adjusted for carryover identified by Federal Aid. Projects were prioritized for funding using the process outlined in the HSIP Handbook and the use of Advance Construction is anticipated if the entire program delivers as planned.

For this funding plan, we have not specified projects by specific funding type, except for VRU special rule eligible projects and Section 130 rail projects. Projects not included for funding in the December 2025 funding plan have been noted as potential Advance Construction, however, the actual delivery of projects throughout the year will continue to assign 154 and 164 funding first. With respect to August Redistribution, this funding plan serves as a snapshot demonstrating a path to meeting all obligations. The PDP and PDA processes will be used to assign 154, 164, 148 or Advance Construction funding at the time of each request. We request signature of the funding plan to initiate HSIP funding for projects.

Your signature below will enable the regions to start projects.

Ryan Anderson, P.E, Commissioner

Projects are funded in order of decreasing Statewide Rank until funds are exhausted.
Regions may optionally advance unfunded projects in accordance with Section 2.11.

All projects, whether obligations are planned for funding year or not, use the following Prioritization Criteria Matrix:

Criteria 1: HSIP Tunnel Vision - "Lives saved and major injuries eliminated..."

Criteria 2: HSIP Tunnel Vision - "... per dollar spent."

Criteria 3A: Prioritize starting projects with fewer elements acknowledged to delay HSIP project implementation, according to regional traffic sections. Score distribution designed to provide greater differentiation.

Criteria 3B: Prioritize projects for rapid delivery of safety improvements, but recognize quality results can take time.

Criteria 4: Scores greater than 0 added only with notes from State Traffic & Safety Engineer explaining use of the bonus score.

SCORE	Criteria 1 (70%) Crashes	Criteria 2 (70%) B/C Ratio	Criteria 3A (30%) Project Deliverability (Only New or Unfunded Old Projects)	Criteria 3B (30%) Project Duration (Only Funded Old Projects)	Criteria 4 (Bonus!) Program Manager's Discretion
5	Ranked Projects, 3 or more serious crashes	B/C > 2.0:1	Nominations with the least risk of schedule / scope creep: no ROW, Environmental = CatX, expected public input / resistance is negligible, and low probability of unforeseen outcomes.	Phase 4 obligations planned in the funding FFY and estimated construction completion by the end of the following FFY.	Scores greater than 0 added only with notes from State Traffic & Safety Engineer explaining use of the bonus score. Scoring is subjective. Scoring for this criteria is anticipated only for the following situations, but other situations may develop requiring the use of this category: 1) Cost fitting: Raising priority just above available funding cutline. The funding cutline is established by the State Traffic & Safety Engineer in consult with Statewide Program Development. - All projects initially falling below the funding cut line are scored 0. - Project by Project, in order of ranking, the value under Criteria 4 is increased from 0 until the project rises above the cutline when sorted. - Process is repeated until no projects below the cutline fit the remaining funding gap. 2) Restrictive funding utilization: Identifying projects capable of using the program's most restrictive funding sources.
4	Ranked Projects, at least 2 serious crashes	1.0:1 < B/C ≤ 2.0:1	XXXXXXXXXX	Phase 4 obligations planned in the next FFY.	
3	Ranked Projects with 1 serious crash OR Non-ranked Systemic Projects to meet nominal ATM Compliance Dates	0.5:1 < B/C ≤ 1.0:1 OR Non-ranked Systemic Projects that: 1) address risks for prominent crash types from the SHSP AND 2) have total project costs estimated less than or equal to 50% of available HSIP funding in the current year	Nominations with an expectation of schedule creep due to ROW, Environmental, public input / resistance, or other issues, but risks are foreseen and accepted.	Phase 4 obligation expected in 2 years.	
2	Ranked Projects with no serious crashes OR Non-ranked Projects with no serious crashes that: 1) address risks for prominent crash types from the SHSP AND 2) have total projects costs estimated less than or equal to 50% of available HSIP funding in the current year	0.2:1 < B/C ≤ 0.5:1	XXXXXXXXXX	Phase 4 obligation expected in 3 years.	
1	Non-ranked Projects with 1 or less serious crashes but either a predicted crash prevention solution approved through the State Traffic & Safety Engineer or an emphasis on injury patterns	B/C not predicted - Spot Improvements	Nominations with an undesired, unexpected schedule creep, could be ROW and Environmental additions.	Phase 4 obligation expected in 4 years or more.	

SHSP Prominent Crash Types:			
Safe Road Users	Young Drivers, Older Drivers	Motorcycles, All-Purpose Vehicles (Off-Road Vehicles), Snowmachines	Impaired Driving, Occupant Protection
Safe Roads and Speeds	Intersections, Lane Departures, Roadway Departures	Speeding

Re: NLCC Support for Transit

Kim,

The NLCC sends this letter to express our support for a strong Transit operation in the Mat Su Valley.

I have attended the last two meetings of the MVP / MPO Technical Committee as an observer and to provide public commentary on potential project nominations for your Municipal Transportation Plan. I have listened intently to the discussions your Technical Committee has had regarding Transit and the issue of a potential “split” of designated federal transit funding between the Transit organization and the Alaska Railroad.

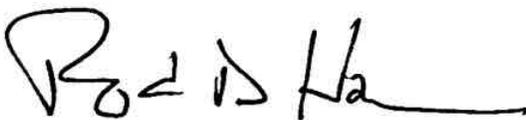

The NLCC is concerned about the level of transit services provided to our area residents. In April of 2025, we submitted a Resolution of Support for Transit Services to the Mat-Su Borough as they sorted through the budget and level of matching funds provided by the Borough. A copy of that resolution is attached for reference by the MVP Technical Committee.

Based on the discussions at your last two Technical Committee meetings, we strongly support a policy position that there should be zero funds split off to the Alaska Railroad. A few key points supporting this position are:

1. Public Input received by the MVP / MPO office through community outreach shows that a robust transit system is strongly supported by residents within the MPO boundaries.
2. We have a number of senior citizens living within our area that rely heavily on the existing transit system.
3. We are concerned that the commitment of matching funds by the Mat Su Borough will be significantly challenged as it is going forward.
4. An approximate \$300k reduction in federal funding availability is a significant percentage of the allocated funding and would negatively impact the ability for ongoing operations, setting aside the actual need for more services.
5. The Alaska Railroad system does not really provide true transit system support that addresses community needs.
6. The Alaska Railroad has not made a convincing argument that they would suffer significantly from a \$300,000 gap in funding. It is a much smaller percentage of their total funding.

Please share this information with the MVP / MPO Technical Committee members as they consider what sort of policy decision will be advanced to the MVP / MPO Policy Board.

Sincerely,

A handwritten signature in black ink that reads "Rod D. Hanson". The signature is fluid and cursive, with a long horizontal line extending to the right.

Attached: NLCC Resolution 25-001

NORTH LAKES COMMUNITY COUNCIL
RESOLUTION OF RECOMMENDATIONS
TO MAT-SU BOROUGH FOR TRANSIT

²⁵⁻⁰⁰¹
RESOLUTION ~~24-003~~ DATED APRIL 24, 2025

The undersigned Chair and Secretary on behalf of the North Lakes Community Council board hereby sign the following resolutions:

WHEREAS, the Matanuska-Susitna Borough population has experienced exponential growth;

WHEREAS, the North Lakes Community Council Resolution ²⁴⁻⁰⁰¹ ~~24-003~~ dated May 2024, requested a plan for a provision for public transit, create bus stop areas, and a park and ride along Bogard road;

WHEREAS, the state of Alaska has experienced an increase in Alaskans over 60+ of 73% between April 2010 and July 2023 per the Alaska Commission on Aging Senior Snapshot;

WHEREAS, the Matanuska- Susitna Borough has one of the fastest growing senior populations in the state of Alaska;

WHEREAS, the highest requested service for seniors is transportation to access medical appointments, grocery shopping, and social activities;

WHEREAS, transportation services are needed for people of all ages who do not have a vehicle or are unable to drive, including, but not limited to, children and youth, individuals experiencing an intellectual or developmental disability, adults with a physical disability, low-income individuals, and others;

WHEREAS, the current transportation providers in the Mat-Su provide over 60,000 rides annually in the core area;

WHEREAS, current transportation providers offer commuter fixed-route and on-demand services;

WHEREAS, the Matanuska – Susitna Borough:

- Has a population greater than 50,000;
- Is now eligible for FTA urban transit funding (5307) as a small urbanized area;
- Urban area transit services are no longer eligible to receive rural transit (5311) funding;
- Assembly, on August 8, 2023, voted unanimously to apply to become the direct recipient and pursue 5307 funding in order to maintain transit services;

NORTH LAKES COMMUNITY COUNCIL
RESOLUTION OF RECOMMENDATIONS
TO MAT-SU BOROUGH FOR TRANSIT

RESOLUTION ²⁵⁻⁰⁰¹ ~~24-003~~ DATED APRIL 24, 2025

WHEREAS, 41% of Mat-Su Borough residents work outside the borough and 28% work in Anchorage;

And WHEREAS, more than half of the Mat-Su Borough population falls into one or more priority populations, with a higher propensity for relying on transit (American Community Survey 5-year Estimates 2016-2020, released March 2022).

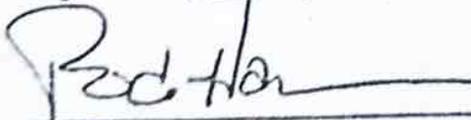

Now THEREFORE, be it resolved that the North Lakes Community Council make the following recommendations to the Matanuska-Susitna Borough for continuation of transit in the Matanuska-Susitna Borough:

1. The Matanuska-Susitna Borough accept the full eligible amount of \$1.5M of FTA urban transit (5307) funding and provide a \$1.5M match to ensure continuation of demand response and commuter fixed route;
2. In accordance with federal and MSB procurement procedures, conduct competitive bid process to contract with provider(s) to continue transit services.

END

We, the undersigned Chair and Secretary do certify through board motion on behalf of the North Lakes Community Council and residents herein approve this resolution.

Signed this 24 day of April 2025.

Rod Hanson, Chair

Nichole Smith, Secretary

NORTH LAKES COMMUNITY COUNCIL RESOLUTION 26-001

**RECOMMENDATIONS FOR PRIORITY
PROJECTS FUNDED THROUGH MAT-SU VALLEY PLANNING ORGANIZATION /
METROPOLITAN PLANNING ORGANIZATION**

DATED: January 20, 2026

The undersigned President and Secretary on behalf of the NORTH LAKES COMMUNITY COUNCIL hereby sign the following resolution:

WHEREAS, the Matanuska-Susitna Borough population has experienced exponential growth;

WHEREAS, the North Lakes Community Council area in the Matanuska-Susitna Borough has experienced a significant increase in residential subdivisions and corresponding increase in traffic;

WHEREAS, area subdivision roads and new connector roads have experienced an increase in traffic as a result of the increase in population and homes;

WHEREAS, the North Lakes Community Council area residents have experienced an increase in road accidents, speeding in residential neighborhoods, and difficulty safely accessing and egressing Bogard road and Wasilla Fishhook road;

WHEREAS, there is additional pedestrian traffic on adjacent roads as a result of the increase in population and adjacent schools;

WHEREAS, Birchwood Charter school is in the process of relocation on the same site as the Shaw Elementary;

WHEREAS, there is an expectation that once the Birchwood Charter School opens, there will be an additional increase in road and pedestrian traffic;

WHEREAS the Matanuska-Susitna Borough Assembly has approved the Bogard-Seldon Corridor Access Management Plan in 2025 and many of the same concerns as expressed by the North Lakes Community Council are included in this plan;

WHEREAS the residents of the North Lakes Community Council have simply seen these concerns grow in magnitude;

And WHEREAS, the North Lakes Community Council area residents deserve safe roads and neighborhoods to raise our families, drive to work & school, and access area resources;

And WHEREAS, the North Lakes Community Council understands that DOT projects are not seeking funding through the MVP / MPO organization, but that MSB projects may involve the DOT and be constructed within DOT road rights of way;

Now therefore, be it RESOLVED that the NORTH LAKES COMMUNITY COUNCIL make the following recommendations to the Matanuska-Susitna Valley Planning Organization for priority funding for MSB transportation projects within the North Lakes Community Council area. Projects are listed in order of priority for the community:

1. (MSB) Intersection of Caribou and Bogard Road. Tied to item 3 below, but much more urgent, is the need for intersection improvements at Caribou and Bogard. This particular intersection is already a major safety concern because there are no provisions for safe left turns onto or off of Bogard Road. Eventually (perhaps 8 years from now), this intersection will be addressed as part of a major DOT project along the Bogard Corridor, but an interim solution is very important. The intersection should be immediately modified to provide left turn capabilities, or make it a right-in, right-out only intersection. This will require relatively simple solutions on Bogard and on Caribou. The intersection will see a major percentage increase in traffic upon the opening of the new Birchtree Charter school.
2. (MSB) Engstrom to Trunk Connection. The NLCC strongly supports a connector link between Engstrom and Trunk Road. The project route selection report is nearing completion. The purpose of the project is to relieve congestion in the "Fishhook Triangle". Depending on the route selected, it may also offer a significant safety benefit by allowing an alternative access for Central Gravel Products and relieving loaded gravel truck operations on the busiest section of Bogard Road. This project should be prioritized with the MVP / MPO organization;
3. (MSB) Caribou - Charley - Mariah Corridor. There is no current MSB project in the works to address the shortcomings (inadequate shoulders, no pedestrian pathway, excessive speeding) of this major "short-cut" corridor between Bogard and Wasilla Fishhook. With anticipated increase in traffic due to the new Birchtree Charter School and two new large subdivisions in the immediate vicinity of the schools on Foxtrot, the NLCC considers it a priority for funding through the MVP / MPO organization;
4. (MSB) Larson Elementary Pedestrian Improvements. As described in the CSAP, add a lighted multi-use path along the west side of Larson Elementary Road from Seldon to the school
5. (MSB) Engstrom North to Tex AI project and Tex AI to Tex AI project. The NLCC fully supports timely execution of these two projects, which will provide significant relief to the Engstrom area. These projects are partially funded and moving forward. The MSB Public Works department indicated that federal funding may slow these projects down. If that position changes, the NLCC would suggest additional construction funding with the MVP / MPO organization;
6. (MSB) Green Forest Drive project. This project is not just a pedestrian improvement project, it must also address road design, condition, and traffic calming measures. This project is in the early design stages. The NLCC supports this project. This project is not fully funded. This project should be prioritized for additional funding with the MVP / MPO organization;

7. (MSB) Cottonwood Loop & Fir Improvements: This project involves an extension of Fir to Finger Lake Elementary and a pedestrian path along Fir and N. Cottonwood Loop to Bogard. The CAMP properly identified a safety problem with bus, vehicle, and pedestrian traffic to Finger Lake Elementary and along Earl Drive. The CAMP recommended extending E. Fir Street to connect with the school property. A project should be initiated to make this happen, along with street improvements and pedestrian walkways along Fir Street and N. Cottonwood Loop to Bogard. This project should be prioritized for funding with the MVP / MPO.
8. (MSB): Intersection of Bogard / Cottonwood Loop / Moose. This is directly related to the Cottonwood Loop & Fir Improvements mentioned above. These two projects will provide much safer vehicle and pedestrian routes to and from Finger Lake School and will relieve problematic congestion at Bogard and Earl. The Cottonwood Loop / Bogard / Moose intersection is already a safety concern because there are no provisions for safe left turns onto or off of Bogard Road. Eventually (perhaps 8 years from now), this intersection will be addressed as part of a major DOT project along the Bogard Corridor, but an interim solution is very important. The intersection should be modified to provide left turn capabilities, pending the major roundabout or signalized intersection envisioned in the DOT Bogard project.
9. (MSB) Bogard Frontage Roads (Caribou to Grayling). The CAMP identified frontage road projects designed to provide much safer alternatives to numerous driveways that currently connect directly to Bogard Road. There needs to be close coordination between the MSB and DOT to determine what scope of work is outside the federally funded Bogard Road improvement projects, and therefore needs funding by the MSB. Once this scope of work is delineated, federal funding through the MVP / MPO is suggested for the MSB scope elements.
10. (MSB) Engstrom Road Reconstruction. After the North Engstrom Extension, The Tex Al Connection, and the Engstrom to Trunk connection road projects are complete, the MSB should advance a project to improve Engstrom Road, adding shoulders, a pathway, and straightening where possible.
11. (MSB) E. Tambert Drive Pedestrian Improvements. As identified in the CSAP, add pedestrian improvements to E. Tambert Drive for the entire length.

WE, THE UNDERSIGNED PRESIDENT AND SECRETARY DO CERTIFY THROUGH BOARD MOTION, ON BEHALF OF THE NORTH LAKES COMMUNITY COUNCIL AND RESIDENTS HEREIN, THIS RESOLUTION IS APPROVED.

This is a list of transportation funding sources to help identify supplemental funding sources for active transportation (AT) projects. It includes funding sources either specifically for AT efforts or incorporate aspects of AT in funding for other transportation types or facilities. Please note that many of the US Department of Transportation (US DOT) funding sources were obtained from a table created in 2023: please check with each source you have interest in to verify whether funding is still available. Under “Funding Amounts”, the funds are categorized as:

- **Formula:** funds that are automatically distributed (no application required), the amounts often based on population numbers; or
- **Competitive:** eligible applicants submit applications for funding; these applications are reviewed and using pre-established criteria (earliest received, best response, highest need, etc.) are awarded based on the quality and impact of their proposal.

Table of Contents:

<u>FUNDING CATEGORY</u>	<u>PAGE</u>

ALASKA-SPECIFIC FUNDING: DENALI COMMISSION AND RASMUSON FOUNDATION

Fund Name	Funded Project Types	Funding Agency	Current Contact	Website Links	Match	Funding Amounts	Permitted Stages or Categories	Applicants Allowed	When to Apply	Specific Requirements and Other Notes
Surface Transportation Projects	Projects that improve infrastructure and access to services: road safety improvements; drainage or drainage structure development/improvement; trail upgrades/improvements; bridge development/improvement; planning or design for new/improved transportation projects; other transportation projects except airport projects. Roads connecting to airports or ports capacity-building or demonstration projects are eligible.	Denali Commission	Nikki Navio Transportation Program Mgr. nnavio@denali.gov (907) 271-1413 Janet Davis Grants Officer jdavis@denali.gov	Funding Opportunity Announcement (Contact Nikki Navio for a detailed description)	No match required	Maximum \$2,000,000 Competitive	<ul style="list-style-type: none"> • Planning • Design • Engineering • Construction 	<ul style="list-style-type: none"> • Municipal, borough, and Tribal governments • Indian Tribes • Regional Tribal non-profit Organizations • Regional housing authorities • Universities • Other non-profit organizations 	Annually Application due in April	Priority is placed on the construction of essential access routes within remote Alaska Native Villages and other rural communities, and for the construction of roads and facilities necessary to connect isolated rural communities to a road system.
Match/Gap Funding Assistance for Surface Transportation Projects	Projects that need match funding from a transportation program or require gap funding for 30% or less of total construction cost. Project activities may include but are not limited to: road improvements; "board" roads, ATV and multi-use trails and walkways; rural transit including capital/operating assistance; other surface transportation projects except for projects on airport facilities.	Denali Commission	Nikki Navio Transportation Program Mgr. nnavio@denali.gov (907) 271-1413 Janet Davis Grants Officer jdavis@denali.gov	Statement of Interest form and Funding Overview	No match required	Maximum \$1,000,000 per community Competitive	<ul style="list-style-type: none"> • Construction • Capital improvements • Operational Enhancements • Supplies or equipment. 	<ul style="list-style-type: none"> • Municipal, borough, state and Tribal governments • Indian Tribes • Regional Tribal non-profit Organizations • Other non-profit organizations 	Annually Statement of Interest due in January	The cost of repair and upgrade of equipment to a project proposal should not exceed 30 percent of the proposed total project. Grant will cover match needs or address funding gaps, to complete surface transport projects and support infrastructure development in rural communities.
Community Support Grants	Projects about capital improvements and projects with a broad community impact. These may include: capital projects (construction and buildings); equipment and tools for community; vehicles and boats; programmatic projects; one-time investments.	Rasmuson Foundation	info@rasmuson.org (907) 297-2700	Rasmuson Grant Guidelines	No match required, but grant rarely covers 100% of project costs	Maximum \$250,000 Competitive	<ul style="list-style-type: none"> • Pilot Project • Demonstration • Construction • Equipment • Vehicles 	<ul style="list-style-type: none"> • Government entities • 501(c)(3) Non-profits • Tribes 	Applications accepted year-round, reviewed on Dec 1, Mar 1, Jun 1, and Sep 1 every year	Programmatic projects can include pilot, expansion or demonstration projects.
Legacy Grants	Projects involving legacy-sized capital projects, programs of strategic importance, and innovative solutions to issues of community or statewide significance.	Rasmuson Foundation	info@rasmuson.org (907) 297-2700	Grant Description and Guidelines	No match required, but grant rarely covers 100% of project costs	Maximum \$1,000,000 Competitive	<ul style="list-style-type: none"> • Pilot Project • Demonstration • Construction • Renovation • Equipment • Vehicles • Preservation • Creative works 	<ul style="list-style-type: none"> • Government entities • 501(c)(3) Non-profits • Tribes <p>The organization must be actively working in Alaska.</p>	Deadline for submission of LOI: Feb 1 and Aug 1 each year	Organizations initiate a grant by submitting Letter of Inquiry (LOI). Selected LOIs invited to submit a full proposal. Non-profits must demonstrate 100% board giving to qualify for a Legacy grant.
Tier 1 grants	Projects ranging from small capital projects to one-time investments.	Rasmuson Foundation	info@rasmuson.org (907) 297-2700	Grant Description and Guidelines	No match required, but grant rarely covers 100% of project costs	Maximum \$35,000 Competitive	<ul style="list-style-type: none"> • Construction • Renovation • Upgrades • Equipment • Vehicles • Other (see webpage) 	<ul style="list-style-type: none"> • 501(c)(3) Non-profits • Tribal government • Local government 	Applications accepted year-round, reviewed on a rolling basis	On a limited basis creative works will be considered, such as Alaska-focused film, books, research, and other cultural projects. Applications must have a strong Alaska context, community impact, and, when applicable, a distribution plan.

AMERICAN ASSOCIATION OF RETIRED PERSONS (AARP) FUNDING (FOCUS ON ELDER ACCESS)

Fund Name	Funded Project Types	Funding Agency	Current Contact	Website Links	Match	Funding Amounts	Permitted Stages or Categories	Applicants Allowed	When to Apply	Specific Requirements and Other Notes
Capacity-Building Microgrants	Projects that implement: disaster preparedness training programs and resources for residents; walk audit assessments to enhance safety and walkability in communities; bike audits to enhance safety and bikeability in communities; and education, home modifications and safety solutions to create and maintain "lifelong homes".	AARP	CommunityChallenge@AARP.org (888) 687-2277 – General Customer Service	Community Challenge web page Community Challenge Announcement	No match required	Maximum \$2,500 Competitive	<ul style="list-style-type: none"> Disaster Preparedness Training Walk Audits Bike Audits HomeFit Guide Modifications 	<ul style="list-style-type: none"> Government entities 501(c)(3) Non-profits Other organizations considered on a case-by-case basis 	Annually Applications due in March	Projects should demonstrate a benefit especially for residents aged 50 and older. <i>Projects must be completed by December of the same year the grant is awarded.</i>
Demonstration Grants	Projects that: enhance pedestrian safety by creating safer streets and sidewalks; expand high-speed internet access and adoption; reconnect communities divided by infrastructure; create housing design competitions that increase community understanding and encourage policies that enable greater choice in housing.	AARP	CommunityChallenge@AARP.org (888) 687-2277 – General Customer Service	2025 Community Challenge web page 2025 Community Challenge Announcement	No match required	Maximum \$25,000 Competitive	<ul style="list-style-type: none"> Pedestrian safety High-speed internet access Reconnecting communities Housing design 	<ul style="list-style-type: none"> Government entities 501(c)(3) Non-profits Other organizations considered on a case-by-case basis 	Annually Applications due in March	Projects should specifically demonstrate a benefit especially for residents aged 50 and older. <i>Projects must be completed by December of the same year the grant is awarded.</i>
Flagship Community Challenge grant	Projects that create: vibrant public places; transportation and mobility options that increase connectivity, walkability, bikeability; housing options that increase accessible, affordable choices; digital connection and literacy skills of residents; improved disaster management, preparedness and mitigation.	AARP	CommunityChallenge@AARP.org (888) 687-2277 – General Customer Service	Community Challenge web page Community Challenge Announcement	No match required	Maximum \$25,000 Competitive	<ul style="list-style-type: none"> Public Places Transportation Housing Digital Connections Community Resilience 	<ul style="list-style-type: none"> Government entities 501(c)(3) Non-profits Other organizations considered on a case-by-case basis 	Annually Applications due in March	Projects should demonstrate a benefit especially for residents aged 50 and older. Projects awarded end of June, and <i>must be completed by December of the same year the grant is awarded.</i>

FUNDING FOR SPECIFIC PROJECT TYPES:

BRIDGE-RELATED FUNDING

Fund Name	Funded Project Types	Funding Agency	Current Contact	Website Links	Match	Funding Amounts	Permitted Stages or Categories	Applicants Allowed	When to Apply	Specific Requirements and Other Notes
Alaska Community Bridge Investment Program (CBIP)	Bridge projects that: improve conditions on those bridges most in need of repair, enhance safety and the reliability of the movement of people and freight over bridges; and do so in a way that maximizes benefits to costs. The associated bridge or tunnel must be State, Tribal, or federally owned. Delivered via email

Dear Members of the MVP MPO Policy Board:

I am writing to inform you of an upcoming leadership transition within the Alaska Department of Transportation and Public Facilities (DOT&PF) Central Region.

After many years of dedicated public service, Central Region Director Sean Holland will be retiring from state service. Director Holland has been a valued leader within DOT&PF and served several years on the MVP MPO Policy Board. We are grateful for his contributions to transportation planning, project delivery, and interagency collaboration throughout the region.

Effective upon Director Hollands' retirement, Deputy Commissioner Katherine Keith will serve as Acting Central Region Director. In this role, Deputy Commissioner Keith will also serve as DOT&PF's designated representative to the MVP MPO Policy Board.

Deputy Commissioner Keith brings extensive experience in transportation policy, capital program delivery, and intergovernmental coordination, and I am confident she will continue DOT&PF's strong engagement with the MVP MPO as we work together to advance regional transportation priorities.

On behalf of the department, thank you for your continued partnership. Please join me in thanking Director Holland for his service and in welcoming Deputy Commissioner Keith in her new role.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ryan Anderson".

Ryan Anderson, P.E.
Commissioner
Alaska Department of Transportation and Public Facilities
